philosophy that perceives music as intrinsic to being human--and being human as intrinsic to listening. Beginning with "music as body"--the musical effects of gravity on the muscles--Mathieu gives a lyrical stream of commentary about music as mind, heart, feelings, life, story, culture, cosmos, enlightenment, and even consciousness.

Musical tones are produced by musical instruments, or by the voice, which, from a physics perspective, is a very complex wind instrument. So the physics of music is the physics of the kinds of sounds these instruments can make. What kinds of sounds are these? They are tones caused by standing waves produced in or on the instrument.

Sobre las Olas - Wikipedia

Music is made up of sound waves. Those waves behave like those found, for example, in a lake. If you watch as waves roll into a flat-faced dam on a windy day, you'll eventually see a wave carom backwards off of the dam and
