This new volume is a collection of thought-provoking essays on the current state of social and organizational psychology. The topics range from data analysis and interpretation, to research ethics, to theoretical issues, to an examination of psychological epistemology and theory. The book is divided into three sections. The first section, focuses on Ralph Rosnow's

greatest contribution to psychology, advancing our knowledge of the methods and ethics of research. This section introduces refinements in research methodology, ethical issues in the conduct of psychological research, and the thorny problems of artifact in behavioral research. Four of the chapters in the next section cover topics in organizational psychology (consumer behavior, rumor in organizational contexts, decision making, and leadership) and three review social psychological topics (science and social issues, smiling, and human values).

corporations need to - and can - identify and implement processes that foster ethical conduct, ensure basic human rights, protect the natural environment, and enhance social justice wherever businesses operate around the globe. "Global Business Citizenship" combines elements of political theory, stakeholder relationships, business ethics, corporate social performance, accountability and measurement, and organizational change. Its practical approach encompasses "best practices" in stakeholder management, experiments in applying
