From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the first comprehensive history of the small—bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all—terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.

On the 75th anniversary of the atomic bombings of Hiroshima and Nagasaki comes this heart-pounding account of the war-room drama inside the cabinets of the United States and Japan that led to Armageddon on August 6, 1945. Here are the secret strategy sessions, fierce debates, looming assassinations, and planned invasions that resulted in history's first use of nuclear weapons in combat, and the ensuing chaotic days as the Japanese government struggled to respond to the reality of nuclear war. During the closing months of World War II, as America's strategic bombing campaign incinerated Japan's cities, two military giants locked in a death embrace of cultural differences and diplomatic intransigence. The leaders of the United States called for the "unconditional surrender" of the Japanese Empire while developing history's deadliest weapon and weighing an invasion, Downfall, that would have dwarfed D-Day. Their enemy responded with a last-ditch plan termed Ketsu-Go, which called for the suicidal resistance of every able-bodied man and woman in "The Decisive Battle" for the homeland. But had Emperor Hirohito's generals miscalculated how far the Americans had come in developing the atomic bomb? How close did President Harry Truman come to ordering the invasion of Japan? Within the Japanese Supreme Council at the Direction of War, a.k.a. "The Big Six," Foreign Minister Shigenori Togo risked assassination in his crusade to convince his dysfunctional government, dominated by militarist fanatics, to save his country from annihilation. Despite Allied warnings of Japan's "prompt and utter destruction" and that the Allies would "brook no delay," the Big Six remained defiant. They refused to surrender even after the atomic bombings of Hiroshima and Nagasaki. How did Japanese leaders come to this impasse? The answers lie in this nearly day-by-day account of the struggle to end the most destructive conflict in history.

Based on a complete teardown and rebuild of the specific vehicle. Feature hundreds of "hands-on" photographs taken of specific repair procedures in progress. Include a full chapter on scheduled owner maintenance. Devote a full chapter solely to emissions systems. Have wiring diagrams published in each manual.

The manual contains separate sections for vehicle service, engines, converters, track drive, track and suspension, and skis and steering.

This guidebook contains: 18 walking, cycling or driving tours to help you discover the city's hidden treasures, star-rated so you can better organize your time; More than 250 restaurants and 70 hotels, with our favourites clearly indicated; More than 30 maps to help you get your bearings and make sure you don't miss a thing! Entire chapters devoted to entertainment (with 70 of the best nightspots) and shopping (including everything from hip second-hand stores to upscale boutiques)!
