Technology is an odd duck: in less than twenty years, Wi-Fi has gone from an amazing (and expensive) luxury to an assumed inclusion in every device you own. And yet, there's plenty of room for improvement...which is why you should consider disabling the old 2.4GHz band on your home's Wi-Fi network and using the newer, faster, less crowded 5GHz band exclusively.

telecommunications standards that were introduced in the 1980s and continued until being replaced by 2G digital telecommunications. The main difference between the two mobile cellular systems, is that the radio signals used by 1G networks are analog, while 2G networks are digital. Although both systems use digital signaling to connect the radio towers to the rest of the telephone system, the voice itself duri
