Complex study of the events and reasons that govern the Senators' decisions when they must confirm the President's choice for Secretary of State

From Louis Brandeis to Robert Bork to Clarence Thomas, the nomination of federal judges has generated intense political conflict. With the coming retirement of one or more Supreme Court Justices--and threats to filibuster lower court judges--the selection process is likely to be, once again, the center of red-hot partisan debate. In *Advice and Consent*, two leading legal scholars, Lee Epstein and Jeffrey A. Segal, offer a brief, illuminating Baedeker to this highly important procedure, discussing everything from constitutional background, to crucial differences in the nomination of judges and justices, to the role of the Judiciary Committee in vetting nominees. Epstein and Segal shed light on the role played by the media, by the American Bar Association, and by special interest groups (whose efforts helped defeat Judge Bork). Though it is often assumed that political clashes over nominees are a new phenomenon, the authors argue that the appointment of justices and judges has always been a highly contentious process--one largely driven by ideological and partisan concerns. The reader discovers how presidents and the senate have tried to remake the bench, ranging from FDR's controversial "court packing" scheme to the Senate's creation in 1978 of 35 new appellate and 117 district court judgeships, allowing the Democrats to shape the judiciary for years. The authors conclude with possible "reforms," from the so-called nuclear option, whereby a majority of the Senate could vote to prohibit filibusters, to the even more dramatic suggestion that Congress eliminate a judge's life tenure either by term limits or compulsory retirement. With key appointments looming on the horizon, *Advice and Consent* provides everything concerned citizens need to know to understand the partisan rows that surround the judicial nominating process.

“Set against the backdrop of Obama’s ascendancy to the presidency . . . A complex and imaginative literary tapestry about family and identity” (Kirkus Reviews, starred review). At once immediate and epic, funny and devastating, this new novel by the author of *Shadowbahn* is a transcendent dispatch from the intersection of art and politics, passion and memory. One November night in a canyon outside Los Angeles, Zan Nordhoc—a failed novelist turned pirate radio DJ—sits before the television with his small, adopted black daughter, watching the election of his country’s first black president, Barack Obama. In the nova of this historic moment, with an economic recession threatening their home, Zan, his wife, and their son set out to solve the enigma of the little girl’s life. When they find themselves scattered and strewn across two continents, a mysterious stranger with a secret appears, who sends the story spiraling forty years into the past. Sweeping from 1960s London and ’70s Berlin to twenty-first-century California, and the beginning-of-civilization Ethiopia, *These Dreams of You* chronicles not only a family struggling to salvage its bonds but a twelve-year-old boy readying himself for what the years to come hold. “Truly electrifying. In its gorgeous, vivid prose and its acutely sensitive soul, *These Dreams of You* shows us just what a novel can still do in our own crazy times.” —The Boston Globe “Drama filled with exuberance.” —The Washington Post “The four Nordhocs who provide the messy, vibrant heart of *These Dreams of You* make up a representative tableau for the new millennium: the American family as mash-up.” —The New York Times Book Review

Story of a powerful Washington columnist and his influence over his colleagues and international politics

“People will be arguing over Nixon at the Movies as much as, for more than half a century, the country at large has been arguing about Nixon.”—Greil Marcus Richard Nixon and the film industry arrived in Southern California in the same year, 1913, and they shared a long and complex history. The president screened Patton multiple times before and during the invasion of Cambodia, for example. In this unique blend of political biography, cultural history, and film criticism, Mark Feeney recounts in detail Nixon’s enthusiastic viewing habits during his presidency, and takes a new and often revelatory approach to Nixon’s career and Hollywood’s, seeing aspects of Nixon’s character, and the nation’s, refracted and reimagined in film. Nixon at the Movies is a “virtuosic” examination of a man, a culture, and a country in a time of tumult (Slate). “By Feeney’s count, Nixon, an unabashed film buff, watched more than 500 movies during the 67 months of his presidency, all carefully listed in an appendix titled ‘What the President Saw and When He Saw It.’ Nixon concentrated intently on whatever was on the screen; he refused to leave even if the picture was a dud and everyone around him was restless. He was omnivorous, would watch anything, though he did have his preferences...Only rarely did he watch R-rated or foreign films. He liked happy endings. Movies were obviously a means of escape for him, and as the Watergate noose tightened, he spent ever more time in the screening room.”—The New York Times
