An introduction to leadership draws on a program developed for an elementary school to show how to apply the principles of "The 7 Habits of Highly Effective People" to help everyone, including young children, identify and use their individual talents.

This book analyzes new theories and practical approaches for promoting excellence in human resource management and leadership. It shows how the principles of creating shared value can be applied to ensure faster learning, training, business development and social renewal. In particular, it presents novel methods and tools for tackling the complexity of management and learning in both business organizations and society. Discussing ontologies, intelligent management systems, and methods for creating knowledge and value added, it offers novel insights into time management and operations optimization, as well as advanced methods for evaluating customers' satisfaction and conscious experience. Based on three AHFE 2020 Virtual Conferences: the AHFE 2020 Conference on Human Factors, Business Management and Society, the AHFE 2020 Conference on Human Factors in Management and Leadership, held on July 16-20, 2020, the book provides researchers and professionals with extensive information, practical tools and inspiring ideas for achieving excellence in a broad spectrum of business and societal activities.

Pain is an increasingly common symptom in children and adolescents, and nearly 5% of the paediatric population now suffer from severe chronic pain conditions. This manual describes the inpatient treatment programme of one of the world's largest treatment facility for chronic pain in children – The German Paediatric Pain Centre – and the guidance provided is also applicable to outpatient pain management. Epidemiology, aetiology,

diagnostics and treatment principles are all examined in detail. Criteria for inpatient treatment are explained, and the structure and organisation of a treatment centre for chronic pain are described. Therapeutic interventions are presented with the aid of many examples of pain management and health care from clinical practice. Special features of pain therapy for children and adolescents suffering from comorbid mental disorders, family difficulties or physical complaints are also discussed.

This book presents the first comprehensive analysis of the second International Self-Report Delinquency study (ISRD-2). An earlier volume, *Juvenile Delinquency in Europe and Beyond* (Springer, 2010) focused mainly on the findings with regard to delinquency, victimization and substance use in each of the individual participating ISRD-2 countries. *The Many Faces of Youth Crime* is based on analysis of the merged data set and has a number of unique features:

- The analyses are based on an unusually large number of respondents (about 67,000 7th, 8th and 9th graders) collected by researchers from 31 countries;
- It includes reports on the characteristics, experiences and behaviour of first and second generation migrant youth from a variety of cultures;
- It is one of the first large-scale international studies asking 12-16 year olds about their victimization experiences (bullying, assault, robbery, theft);
- It describes both intriguing differences between young people from different countries and country clusters in the nature and extent of delinquency, victimization and substance use, as well as remarkable cross-national uniformities in delinquency, victimization, and substance use patterns;
- A careful comparative analysis of the social responses to offending and victimization adds to our limited knowledge on this important issue;
- Detailed chapters on the family, school, neighbourhood, lifestyle and peers provide a rich comparative description of these institutions and their impact on delinquency;
- It tests a number of theoretical perspectives (social control, self-control, social disorganization,

routine activities/opportunity theory) on a large international sample from a variety of national contexts; □ It combines a theoretical focus with a thoughtful consideration of the policy implications of the findings; □ An extensive discussion of the ISRD methodology of □flexible standardization□ details the challenges of comparative research. The book consists of 12 chapters, which also may be read individually by those interested in particular special topics (for instance, the last chapter should be of special interest to policy makers). The material is presented in such a way that it is accessible to more advanced students, researchers and scholars in a variety of fields, such as criminology, sociology, deviance, social work, comparative methodology, youth studies, substance use studies, and victimology.

Drawing on the legacy of Paulo Freire and the insights of Antonio Gramsci, this book provides new ways of working with communities which put people at the heart of the development agenda. In addition, it offers a strong theoretical basis for action and an insight into the practical application of popular education methods and is based upon strong traditions of practice experience from both the developing and developed worlds. The book is structured so that the theory and practice are integrated. Each chapter provides key discussion points, practice examples, learning activities and a summary of content and learning points.

This report provides a detailed diagnosis of the youth labour market and VET system in Lithuania from an international comparative perspective, and offers tailored recommendations to help improve school-to-work transitions.
