

Balancing Chemical Equations Multiple Choice Test

If you ally habit such a referred balancing chemical equations multiple choice test book that will have the funds for you worth, get the extremely best seller from us currently from several preferred authors. If you desire to comical books, lots of novels, tale, jokes, and more fictions collections are afterward launched, from best seller to one of the most current released.

You may not be perplexed to enjoy every ebook collections balancing chemical equations multiple choice test that we will unquestionably offer. It is not nearly the costs. It's virtually what you compulsion currently. This balancing chemical equations multiple choice test, as one of the most operating sellers here will utterly be along with the best options to review.

A Level Chemistry Multiple Choice Questions and Answers (MCQs): Quizzes & Practice Tests with Answer Key PDF, A Level Chemistry Worksheets & Quick Study Guide covers exam review worksheets to solve problems with 1750 solved MCQs. "A Level Chemistry MCQ" PDF with answers covers concepts, theory and analytical assessment tests. "A Level Chemistry Quiz" PDF book helps to practice test questions from exam prep notes. Chemistry study guide provides 1750 verbal, quantitative, and analytical reasoning solved past question papers MCQs. A Level Chemistry Multiple Choice Questions and Answers PDF download, a book covers solved quiz questions and answers on chapters: Alcohols and esters, atomic structure and theory, benzene, chemical compound, carbonyl compounds, carboxylic acids, acyl compounds, chemical bonding, chemistry of life, electrode potential, electrons in atoms, enthalpy change, equilibrium, group IV, groups II and VII, halogenoalkanes, hydrocarbons, introduction to organic chemistry, ionic equilibria, lattice energy, moles and equations, nitrogen and sulfur, organic and nitrogen compounds, periodicity, polymerization, rates of reaction, reaction kinetics, redox reactions and electrolysis, states of matter, transition elements worksheets for college and university revision guide. "A Level Chemistry Quiz Questions and Answers" PDF download with free sample test covers beginner's questions and mock tests with exam workbook answer key. A level chemistry MCQs book, a quick study guide from textbooks and lecture notes provides exam practice tests. "A Level Chemistry Worksheets" PDF book with answers covers problem solving in self-assessment workbook from chemistry textbooks with past papers worksheets as: Worksheet 1: Alcohols and Esters MCQs Worksheet 2: Atomic Structure and Theory MCQs Worksheet 3: Benzene: Chemical Compound MCQs Worksheet 4: Carbonyl Compounds MCQs Worksheet 5: Carboxylic Acids and Acyl Compounds MCQs Worksheet 6: Chemical Bonding MCQs Worksheet 7: Chemistry of Life MCQs Worksheet 8: Electrode Potential MCQs Worksheet 9: Electrons in Atoms MCQs Worksheet 10: Enthalpy Change MCQs Worksheet 11: Equilibrium MCQs Worksheet 12: Group IV MCQs Worksheet 13: Groups II and VII MCQs Worksheet 14: Halogenoalkanes MCQs Worksheet 15: Hydrocarbons MCQs Worksheet 16: Introduction to Organic Chemistry MCQs Worksheet 17: Ionic Equilibria MCQs Worksheet 18: Lattice Energy MCQs Worksheet 19: Moles and Equations MCQs Worksheet 20: Nitrogen and Sulfur MCQs Worksheet 21: Organic and Nitrogen Compounds MCQs Worksheet 22: Periodicity MCQs Worksheet 23: Polymerization MCQs Worksheet 24: Rates of Reaction MCQs Worksheet 25: Reaction Kinetics MCQs Worksheet 26: Redox Reactions and Electrolysis MCQs Worksheet 27: States of Matter MCQs Worksheet 28: Transition Elements MCQs Practice Alcohols and Esters MCQ PDF with answers to solve MCQ test questions: Introduction to alcohols, and alcohols reactions. Practice Atomic Structure and Theory MCQ PDF with answers to solve MCQ test questions: Atom facts, elements and atoms, number of nucleons, protons, electrons, and neutrons. Practice Benzene: Chemical Compound MCQ PDF with answers to solve MCQ test questions: Introduction to benzene, arenes reaction, phenol and properties, and reactions of phenol. Practice Carbonyl Compounds MCQ PDF with answers to solve MCQ test questions: Introduction to carbonyl compounds, aldehydes and ketone testing, nucleophilic addition with HCN, preparation of aldehydes and ketone, reduction of aldehydes and ketone, and ketone. Practice Carboxylic Acids and Acyl Compounds MCQ PDF with answers to solve MCQ test questions: Acidity of carboxylic acids, acyl chlorides, ethanoic acid, and reactions to form tri-iodomethane. Practice Chemical Bonding MCQ PDF with answers to solve MCQ test questions: Chemical bonding types, chemical bonding electron pair, bond angle, bond energy, bond length, bonding and physical properties, bonding energy, repulsion theory, covalent bonding, covalent bonds, double covalent bonds, triple covalent bonds, electron pair repulsion and bond angles, electron pair repulsion theory, enthalpy change of vaporization, intermolecular forces, ionic bonding, ionic bonds and covalent bonds, ionic bonds, metallic bonding, metallic bonding and delocalized electrons, number of electrons, sigma bonds and pi bonds, sigma-bonds, pi-bonds, s-orbital and p-orbital, Van der Waals forces, and contact points. Practice Chemistry of Life MCQ PDF with answers to solve MCQ test questions: Introduction to chemistry, enzyme specificity, enzymes, reintroducing amino acids, and proteins. Practice Electrode Potential MCQ PDF with answers to solve MCQ test questions: Electrode potential, cells and batteries, E-Plimsoll values, electrolysis process, measuring standard electrode potential, quantitative electrolysis, redox, and oxidation. Practice Electrons in Atoms MCQ PDF with answers to solve MCQ test questions: Electronic configurations, electronic structure evidence, ionization energy, periodic table, simple electronic structure, sub shells, and atomic orbitals. Practice Enthalpy Change MCQ PDF with answers to solve MCQ test questions: Standard enthalpy changes, bond energies, enthalpies, Hess law, introduction to energy changes, measuring enthalpy changes, measuring enthalpy changes. Practice Equilibrium MCQ PDF with answers to solve MCQ test questions: Equilibrium constant expression, equilibrium position, acid base equilibria, chemical industry equilibria, ethanoic acid, gas reactions equilibria, and reversible reactions. Practice Group IV MCQ PDF with answers to solve MCQ test questions: Introduction to group IV, metallic character of group IV elements, ceramic, silicon oxide, covalent bonds, properties variation in group IV, relative stability of oxidation states, and tetra chlorides. Practice Groups II and VII MCQ PDF with answers to solve MCQ test questions: Atomic number of group II metals, covalent bonds, density of group II elements, disproportionation, fluorine, group II elements and reactions, group VII elements and reactions, halogens and compounds, ionic bonds, melting points of group II elements, metallic radii of group II elements, periodic table elements, physical properties of group II elements, physical properties of group VII elements, reaction of group II elements with oxygen, reactions of group II elements, reactions of group VII elements, thermal decomposition of carbonates and nitrates, thermal decomposition of group II carbonates, thermal decomposition of group II nitrates, uses of group ii elements, uses of group II metals, uses of halogens and their compounds. Practice Halogenoalkanes MCQ PDF with answers to solve MCQ test questions: Halogenoalkanes, uses of halogenoalkanes, elimination reactions, nucleophilic substitution in halogenoalkanes, and nucleophilic substitution reactions. Practice Hydrocarbons MCQ PDF with answers to solve MCQ test questions: Introduction to alkanes, sources of alkanes, addition reactions of alkenes, alkane reaction, alkenes and formulas. Practice Introduction to Organic Chemistry MCQ PDF with answers to solve MCQ test questions: Organic chemistry, functional groups, organic reactions, naming organic compounds, stereoisomerism, structural isomerism, and types of organic reactions. Practice Ionic Equilibria MCQ PDF with answers to solve MCQ test questions: Introduction to ionic equilibria, buffer solutions, equilibrium and solubility, indicators and acid base titrations, pH calculations, and weak acids. Practice Lattice Energy MCQ PDF with answers to solve MCQ test questions: Introduction to lattice energy, ion polarization, lattice energy value, atomization and electron affinity, Born Haber cycle, and enthalpy changes in solution. Practice Moles and Equations MCQ PDF with answers to solve MCQ test questions: Amount of substance, atoms, molar masses, chemical formula and equations, gas volumes, mole calculations, relative atomic mass, solutions, and concentrations. Practice Nitrogen and Sulfur MCQ PDF with answers to solve MCQ test questions: Nitrogen gas, nitrogen and its compounds, nitrogen and gas properties, ammonia, ammonium compounds, environmental problems caused by nitrogen compounds and nitrate fertilizers, sulfur and oxides, sulfuric acid and properties, and uses of sulfuric acid. Practice Organic and Nitrogen Compounds MCQ PDF with answers to solve MCQ test questions: Amides in chemistry, amines, amino acids, peptides and proteins. Practice Periodicity MCQ PDF with answers to solve MCQ test questions: Acidic oxides, basic oxides, aluminum oxide, balancing equation, period 3 chlorides, balancing equations: reactions with chlorine, balancing equations: reactions with oxygen, bonding nature of period 3 oxides, chemical properties of chlorine, chemical properties of oxygen, chemical properties periodicity, chemistry periodic table, chemistry: oxides, chlorides of period 3 elements, electrical conductivity in period 3 oxides, electronegativity of period 3 oxides, ionic bonds, molecular structures of period 3 oxides, oxidation number of oxides, oxidation numbers, oxides and hydroxides of period 3 elements, oxides of period 3 elements, period III chlorides, periodic table electronegativity, physical properties periodicity, reaction of sodium and magnesium with water, and relative melting point of period 3 oxides. Practice Polymerization MCQ PDF with answers to solve MCQ test questions: Types of polymerization, polyamides, polyesters, and polymer deductions. Practice Rates of Reaction MCQ PDF with answers to solve MCQ test questions: Catalysis, collision theory, effect of concentration, reaction kinetics, and temperature effect on reaction rate. Practice Reaction Kinetics MCQ PDF with answers to solve MCQ test questions: Reaction kinetics, catalysts, kinetics and reaction mechanism, order of reaction, rate constant k, and rate of reaction. Practice Redox Reactions and Electrolysis MCQ PDF with answers to solve MCQ test questions: Redox reaction, electrolysis technique, oxidation numbers, redox and electron transfer. Practice States of Matter MCQ PDF with answers to solve MCQ test questions: states of matter, ceramics, gaseous state, liquid state, materials conservation, and solid state. Practice Transition Elements MCQ PDF with answers to solve MCQ test questions: transition element, ligands and complex formation, physical properties of transition elements, redox and oxidation.

The Mastering System is the most effective and widely used online homework, tutorial, and assessment system for the sciences. It delivers self-paced tutorials that focus on your course objectives, provide individualized coaching, and respond to each student ' s progress. The Mastering system helps instructors maximize class time with easy-to-assign, customizable, and automatically graded assessments that motivate students to learn outside of class and arrive prepared for lecture or lab. New to MasteringChemistry: MasteringChemistry metadata analysis of problems/tutorials assigned in the previous edition have been used to revise end-of-chapter problems in the Third Edition. Approximately 1,000 end-of-chapter questions have been enhanced with feedback, meeting instructor ' s need for more tutorial-like questions. Interactive versions of selected worked examples in the text have been created and are incorporated into MasteringChemistry as assignable tutorial activities, providing an office hour-like experience. These can also be used for mobile learning through a downloadable app. 15 Pause and Predict Video Quizzes bring chemistry to life with lab demonstrations illustrating key topics in general chemistry. Students are asked to predict the outcome of experiments as they watch the videos; a set of multiple-choice questions challenges students to apply the concepts from the video to related scenarios. 8 pHEt tutorials have been developed around interactive applets that foster conceptual understanding and active learning. Topics include acid-base solutions, balancing chemical equations, and molecular polarity. Multiple-choice Reading Questions are provided for each chapter, making it easy to hold students accountable for doing assigned readings before lecture. Enhanced end-of-chapter questions within MasteringChemistry providing wrong-answer feedback have been added. Sketch-it type problems have been added for each chapter. Simulations cover some of the most difficult chemistry concepts and are written by the leading authors in simulation development. Select end-of-chapter questions and reading quizzes have been tagged to learning outcomes. The overall number of algorithmic and randomized problems have been increased to 40%, offering a more rounded program for departments moving to online high-stakes testing.

Provides techniques for achieving high scores on the AP chemistry exam and includes full-length practice tests.

Provides techniques for achieving high scores on the AP chemistry exam and includes two full-length practice tests, a subject review for all topics, and sample questions and answers.

Master the SAT II Chemistry Subject Test and score higher... Our test experts show you the right way to prepare for this important college exam. REA's SAT II Chemistry test prep covers all chemistry topics to appear on the actual exam including in-depth coverage of the laws of chemistry, properties of solids, gases and liquids, chemical reactions, and more. The book features 6 full-length practice SAT II Chemistry exams. Each practice exam question is fully explained to help you better understand the subject material. Use the book's Periodic Table of Elements for speedy look-up of the properties of each element. Follow up your study with REA's proven test-taking strategies, powerhouse drills and study schedule that get you ready for test day. DETAILS - Comprehensive review of every chemistry topic to appear on the SAT II subject test - Flexible study schedule tailored to your needs - Packed with proven test tips, strategies and advice to help you master the test - 6 full-length practice SAT II Chemistry Subject tests. Each test question is answered in complete detail with easy-to-follow, easy-to-grasp explanations. - The book's handy Periodic Table of Elements allows for quick answers on the elements appearing on the exam TABLE OF CONTENTS About Research and Education Association Independent Study Schedule CHAPTER 1 - ABOUT THE SAT II: CHEMISTRY SUBJECT TEST About This Book About The Test How To Use This Book Format of the SAT II: Chemistry Scoring the SAT II: Chemistry Score Conversion Table Studying for the SAT II: Chemistry Test Taking Tips CHAPTER 2 - COURSE REVIEW Gases Gas Laws Gas Mixtures and Other Physical Properties of Gases Dalton's Law of Partial Pressures Avogadro's Law (The Mole Concept) Avogadro's Hypothesis: Chemical Compounds and Formulas Mole Concept Molecular Weight and Formula Weight Equivalent Weight Chemical Composition Stoichiometry/Weight and Volume Calculations Balancing Chemical Equations Calculations Based on Chemical Equations Limiting-Reactant Calculations Solids Phase Diagram Phase Equilibrium Properties of Liquids Density Colligative Properties of Solutions Raoult's Law and Vapor Pressure Osmotic Pressure Solution Chemistry Concentration Units Equilibrium The Law of Mass Action Kinetics and Equilibrium Le Chatelier's Principle and Chemical Equilibrium Acid-Base Equilibria Definitions of Acids and Bases Ionization of Water, pH Dissociation of Weak Electrolytes Dissociation of Polyprotic Acids Buffers Hydrolysis Thermodynamics I Bond Energies Some Commonly Used Terms in Thermodynamics The First Law of Thermodynamics Enthalpy Hess's Law of Heat Summation Standard States Heat of Vaporization and Heat of Fusion Thermodynamics II Entropy The Second Law of Thermodynamics Standard Entropies and Free Energies Electrochemistry Oxidation and Reduction Electrolytic Cells Non-Standard-State Cell Potentials Atomic Weight Types of Bonds Periodic Trends Electronegativity Quantum Chemistry Basic Electron Charges Components of Atomic Structure The Wave Mechanical Model Subshells and Electron Configuration Double and Triple Bonds Organic Chemistry: Nomenclature and Structure Alkanes Alkenes Dienes Alkynes Alkyl Halides Cyclic Hydrocarbons Aromatic Hydrocarbons Aryl Halides Ethers and Epoxides Alcohols and Glycols Carboxylic Acids Carboxylic Acid Derivatives Esters Amides Arenes Aldehydes and Ketones Amines Phenols and Quinones Structural Isomerism SIX PRACTICE EXAMS "Practice Test 1 " Answer Key Detailed Explanations of Answers "Practice Test 2 " Answer Key Detailed Explanations of Answers "Practice Test 3 " Answer Key Detailed Explanations of Answers "Practice Test 4 " Answer Key Detailed Explanations of Answers "Practice Test 5 " Answer Key Detailed Explanations of Answers "Practice Test 6 " Answer Key Detailed Explanations of Answers THE PERIODIC TABLE EXCERPT About Research & Education Association Research & Education Association (REA) is an organization of educators, scientists, and engineers specializing in various academic fields. Founded in 1959 with the purpose of disseminating the most recently developed scientific information to groups in industry, government, high schools, and universities, REA has since become a successful and highly respected publisher of study aids, test preps, handbooks, and reference works. REA's Test Preparation series includes study guides for all academic levels in almost all disciplines. Research & Education Association publishes test preps for students who have not yet completed high school, as well as high school students preparing to enter college. Students from countries around the world seeking to attend college in the United States will find the assistance they need in REA's publications. For college students seeking advanced degrees, REA publishes test preps for many major graduate school admission examinations in a wide variety of disciplines, including engineering, law, and medicine. Students at every level, in every field,

with every ambition can find what they are looking for among REA's publications. While most test preparation books present practice tests that bear little resemblance to the actual exams, REA's series presents tests that accurately depict the official exams in both degree of difficulty and types of questions. REA's practice tests are always based upon the most recently administered exams, and include every type of question that can be expected on the actual exams. REA's publications and educational materials are highly regarded and continually receive an unprecedented amount of praise from professionals, instructors, librarians, parents, and students. Our authors are as diverse as the fields represented in the books we publish. They are well-known in their respective disciplines and serve on the faculties of prestigious high schools, colleges, and universities throughout the United States and Canada. CHAPTER 1 - ABOUT THE SAT II: CHEMISTRY SUBJECT TEST ABOUT THIS BOOK This book provides you with an accurate and complete representation of the SAT II: Chemistry Subject Test. Inside you will find a complete course review designed to provide you with the information and strategies needed to do well on the exam, as well as six practice tests based on the actual exam. The practice tests contain every type of question that you can expect to appear on the SAT II: Chemistry test. Following each test you will find an answer key with detailed explanations designed to help you master the test material. ABOUT THE TEST Who Takes the Test and What Is It Used For? Students planning to attend college take the SAT II: Chemistry Subject Test for one of two reasons: (1) Because it is an admission requirement of the college or university to which they are applying; "OR" (2) To demonstrate proficiency in Chemistry. The SAT II: Chemistry exam is designed for students who have taken one year of college preparatory chemistry. Who Administers The Test? The SAT II: Chemistry Subject Test is developed by the College Board and administered by Educational Testing Service (ETS). The test development process involves the assistance of educators throughout the country, and is designed and implemented to ensure that the content and difficulty level of the test are appropriate. When Should the SAT II: Chemistry be Taken? If you are applying to a college that requires Subject Test scores as part of the admissions process, you should take the SAT II: Chemistry Subject Test toward the end of your junior year or at the beginning of your senior year. If your scores are being used only for placement purposes, you may be able to take the test in the spring of your senior year. For more information, be sure to contact the colleges to which you are applying. When and Where is the Test Given? The SAT II: Chemistry Subject Test is administered five times a year at many locations throughout the country; mostly high schools. To receive information on upcoming administrations of the exam, consult the publication Taking the SAT II: Subject Tests, which may be obtained from your guidance counselor or by contacting: College Board SAT Program P.O. Box 6200 Princeton, NJ 08541-6200 Phone: (609) 771-7600 Website: <http://www.collegeboard.com> Is There a Registration Fee? Yes. There is a registration fee to take the SAT II: Chemistry. Consult the publication Taking the SAT II: Subject Tests for information on the fee structure. Financial assistance may be granted in certain situations. To find out if you qualify and to register for assistance, contact your academic advisor. HOW TO USE THIS BOOK What Do I Study First? Remember that the SAT II: Chemistry Subject Test is designed to test knowledge that has been acquired throughout your education. Therefore, the best way to prepare for the exam is to refresh yourself by thoroughly studying our review material and taking the sample tests provided in this book. They will familiarize you with the types of questions, directions, and format of the SAT II: Chemistry Subject Test. To begin your studies, read over the review and the suggestions for test-taking, take one of the practice tests to determine your area(s) of weakness, and then study the review material, focusing on your specific problem areas. The course review includes the information you need to know when taking the exam. Be sure to take the remaining practice tests to further test yourself and become familiar with the format of the SAT II: Chemistry Subject Test. When Should I Start Studying? It is never too early to start studying for the SAT II: Chemistry test. The earlier you begin, the more time you will have to sharpen your skills. Do not procrastinate! Cramming is not an effective way to study, since it does not allow you the time needed to learn the test material. The sooner you learn the format of the exam, the more comfortable you will be when you take the exam. FORMAT OF THE SAT II: CHEMISTRY The SAT II: Chemistry is a one-hour exam consisting of 85 multiple-choice questions. The first part of the exam consists of classification questions. This question type presents a list of statements or questions that you must match up with a group of choices lettered (A) through (E). Each choice may be used once, more than once, or not at all. The exam then shifts to relationship analysis questions which you will answer in a specially numbered section of your answer sheet. You will have to determine if each of two statements is true or false and if the second statement is a correct explanation of the first. The last section is composed strictly of multiple-choice questions with choices lettered (A) through (E). Material Tested The following chart summarizes the distribution of topics covered on the SAT II: Chemistry Subject Test. Topic / Percentage / Number of Questions Atomic & Molecular Structure / 25% / 21 questions States of Matter / 15% / 13 questions Reaction Types / 14% / 12 questions Stoichiometry / 12% / 10 questions Equilibrium & Reaction Times / 7% / 6 questions Thermodynamics / 6% / 5 questions Descriptive Chemistry / 13% / 11 questions Laboratory / 8% / 7 questions The questions on the SAT II: Chemistry are also grouped into three larger categories according to how they test your understanding of the subject material. Category / Definition / Approximate Percentage of Test 1) Factual Recall / Demonstrating a knowledge and understanding of important concepts and specific information / 20% 2) Application / Taking a specific principle and applying it to a practical situation / 45% 3) Integration / Inferring information and drawing conclusions from particular relationships / 35% STUDYING FOR THE SAT II: CHEMISTRY It is very important to choose the time and place for studying that works best for you. Some students may set aside a certain number of hours every morning to study, while others may choose to study at night before going to sleep. Other students may study during the day, while waiting on line, or even while eating lunch. Only you can determine when and where your study time will be most effective. Be consistent and use your time wisely. Work out a study routine and stick to it! When you take the practice tests, try to make your testing conditions as much like the actual test as possible. Turn your television and radio off, and sit down at a quiet desk or table free from distraction. Make sure to clock yourself with a timer. As you complete each practice test, score it and thoroughly review the explanations to the questions you answered incorrectly; however, do not review too much at any one time. Concentrate on one problem area at a time by reviewing the questions and explanations, and by studying our review until you are confident you completely understand the material. Keep track of your scores. By doing so, you will be able to gauge your progress and discover general weaknesses in particular sections. You should carefully study the reviews that cover your areas of difficulty, as this will build your skills in those areas. TEST TAKING TIPS Although you may be unfamiliar with standardized tests such as the SAT II: Chemistry Subject Test, there are many ways to acquaint yourself with this type of examination and help alleviate your test-taking anxieties. Become comfortable with the format of the exam. When you are practicing to take the SAT II: Chemistry Subject Test, simulate the conditions under which you will be taking the actual test. Stay calm and pace yourself. After simulating the test only a couple of times, you will boost your chances of doing well, and you will be able to sit down for the actual exam with much more confidence. Know the directions and format for each section of the test. Familiarizing yourself with the directions and format of the exam will not only save you time, but will also ensure that you are familiar enough with the SAT II: Chemistry Subject Test to avoid nervousness (and the mistakes caused by being nervous). Do your scratchwork in the margins of the test booklet. You will not be given scrap paper during the exam, and you may not perform scratchwork on your answer sheet. Space is provided in your test booklet to do any necessary work or draw diagrams. If you are unsure of an answer, guess. However, if you do guess - guess wisely. Use the process of elimination by going through each answer to a question and ruling out as many of the answer choices as possible. By eliminating three answer choices, you give yourself a fifty-fifty chance of answering correctly since there will only be two choices left from which to make your guess. Mark your answers in the appropriate spaces on the answer sheet. Fill in the oval that corresponds to your answer darkly, completely, and neatly. You can change your answer, but remember to completely erase your old answer. Any stray lines or unnecessary marks may cause the machine to score your answer incorrectly. When you have finished working on a section, you may want to go back and check to make sure your answers correspond to the correct questions. Marking one answer in the wrong space will throw off the rest of your test, whether it is graded by machine or by hand. You don't have to answer every question. You are not penalized if you do not answer every question. The only penalty results from answering a question incorrectly. Try to use the guessing strategy, but if you are truly stumped by a question, remember that you do not have to answer it. Work quickly and steadily. You have a limited amount of time to work on each section, so you need to work quickly and steadily. Avoid focusing on one problem for too long. Before the Test Make sure you know where your test center is well in advance of your test day so you do not get lost on the day of the test. On the night before the test, gather together the materials you will need the next day: - Your admission ticket - Two forms of identification (e.g., driver's license, student identification card, or current alien registration card) - Two No. 2 pencils with erasers - Directions to the test center - A watch (if you wish) but not one that makes noise, as it may disturb other test-takers On the day of the test, you should wake up early (after a good night's rest) and have breakfast. Dress comfortably, so that you are not distracted by being too hot or too cold while taking the test. Also, plan to arrive at the test center early. This will allow you to collect your thoughts and relax before the test, and will also spare you the stress of being late. If you arrive after the test begins, you will not be admitted to the test center and you will not receive a refund. During the Test When you arrive at the test center, try to find a seat where you feel most comfortable. Follow all the rules and instructions given by the test supervisor. If you do not, you risk being dismissed from the test and having your scores canceled. Once all the test materials are passed out, the test instructor will give you directions for filling out your answer sheet. Fill this sheet out carefully since this information will appear on your score report. After the Test When you have completed the SAT II: Chemistry Subject Test, you may hand in your test materials and leave. Then, go home and relax! When Will I Receive My Score Report and What Will It Look Like? You should receive your score report about five weeks after you take the test. This report will include your scores, percentile ranks, and interpretive information.

"2 full-length practice tests with complete answer explanations"--Cover.

A NEWER EDITION OF THIS TITLE IS AVAILABLE. SEE ISBN: 978-0-7386-0427-5 Our savvy test experts show you the way to master the test and score higher. This new and fully expanded edition examines all AP Chemistry areas including in-depth coverage of solutions, stoichiometry, kinetics, and thermodynamics. The comprehensive review covers every possible exam topic: the structure of matter, the states of matter, chemical reactions, and descriptive chemistry. Features 6 full-length practice exams with all answers thoroughly explained. Follow up your study with REA's test-taking strategies, powerhouse drills and study schedule that get you ready for test day. DETAILS - Comprehensive, up-to-date subject review of every AP Chemistry topic used in the AP exam - Study schedule tailored to your needs - Packed with proven key exam tips, insights and advice - 6 full-length practice exams. All exam answers are fully detailed with easy-to-follow, easy-to-grasp explanations. TABLE OF CONTENTS About Research & Education Association Preface About the Test Scoring Contacting the AP Program AP CHEMISTRY COURSE REVIEW CHAPTER 1 - THE STRUCTURE OF MATTER A. ATOMIC PROPERTIES 1. The Atomic Theory and Evidence for the Atomic Theory 2. Chemical and Physical Approaches to Atomic Weight Determination 3. Atomic Number and Mass Number, Isotopes, Mass Spectroscopy 4. Electron Energy Levels 5. The Periodic Table and Periodic Relationships: Symbols, Radii, Ionization Energy, Electron Affinity, Oxidation States B. BONDING 1. Types of Bonds 2. Effects of Bonding Forces on States, Structures, and Properties of Matter 3. Polarity and Electronegativity 4. Geometry of Ions, Molecules, and Coordination Complexes 5. Molecular Models C. NUCLEAR CHEMISTRY, NUCLEAR EQUATIONS, HALF-LIVES, RADIOACTIVITY CHAPTER 2 - STATES OF MATTER A. GASES 1. Ideal Gas Laws 2. Kinetic Molecular Theory B. LIQUIDS AND SOLIDS 1. Kinetic-Molecular View of Liquids and Solids 2. Phase Diagram 3. Changes of State, Critical Phenomena 4. Structure of Crystals C. SOLUTIONS 1. Types of Solutions 2. Factors Affecting Solubility 3. Ways of Expressing Concentrations 4. Colligative Properties 5. Interionic Attractions CHAPTER 3 - REACTIONS A. TYPES 1. Forming and Cleaving Covalent Bonds 2. Precipitation 3. Oxidation and Reduction B. STOICHIOMETRY 1. Recognizing the Presence of Ionic and Molecular Species 2. Balancing Chemical Equations 3. Weight and Volume Relationships C. EQUILIBRIUM 1. Dynamic Equilibrium Both Physical and Chemical 2. The Relationship Between Kp and Kc 3. Equilibrium Constants for Reactions in Solutions D. KINETICS 1. Rate of Reaction 2. Reaction Order 3. Temperature Changes and Effect on Rate 4. Activation Energy 5. Mechanism of a Reaction E. THERMODYNAMICS 1. State Functions 2. The First Law of Thermodynamics 3. The Second Law of Thermodynamics 4. Change in Free Energy CHAPTER 4 - DESCRIPTIVE CHEMISTRY 1. Horizontal, Vertical, and Diagonal Relationships in the Periodic Table 2. Chemistry of the Main Groups and Transition Elements and Representatives of Each 3. Organic Chemistry 4. Structural Isomerism PRACTICE EXAMS AP CHEMISTRY EXAM I AP CHEMISTRY EXAM II AP CHEMISTRY EXAM III AP CHEMISTRY EXAM IV AP CHEMISTRY EXAM V AP CHEMISTRY EXAM VI FORMULAS AND TABLES EXCERPT About Research & Education Association Research & Education Association (REA) is an organization of educators, scientists, and engineers specializing in various academic fields. Founded in 1959 with the purpose of disseminating the most recently developed scientific information to groups in industry, government, high schools, and universities, REA has since become a successful and highly respected publisher of study aids, test preps, handbooks, and reference works. REA's Test Preparation series includes study guides for all academic levels in almost all disciplines. Research & Education Association publishes test preps for students who have not yet completed high school, as well as high school students preparing to enter college. Students from countries around the world seeking to attend college in the United States will find the assistance they need in REA's publications. For college students seeking advanced degrees, REA publishes test preps for many major graduate school admission examinations in a wide variety of disciplines, including engineering, law, and medicine. Students at every level, in every field, with every ambition can find what they are looking for among REA's publications. While most test preparation books present practice tests that bear little resemblance to the actual exams, REA's series presents tests that accurately depict the official exams in both degree of difficulty and types of questions. REA's practice tests are always based upon the most recently administered exams, and include every type of question that can be expected on the actual exams. REA's publications and educational materials are highly regarded and continually receive an unprecedented amount of praise from professionals, instructors, librarians, parents, and students. Our authors are as diverse as the fields represented in the books we publish. They are well-known in their respective disciplines and serve on the faculties of prestigious high schools, colleges, and universities throughout the United States and Canada. PREFACE This book provides an accurate and complete representation of the Advanced Placement Examination in Chemistry. Our six practice exams are based on the most recently administered Advanced Placement Chemistry Exams. Each exam is three hours in length and includes every type of question that can be expected on the actual exam. Following each exam is an answer key complete with detailed explanations designed to clarify and contextualize the material. By completing all six exams and studying the explanations which follow, you can discover your strengths and weaknesses and thereby become well prepared for the actual exam. The formulas and tables for the AP Chemistry Exam can be found at the back of this book, beginning on page 417. You will be provided these formulas and tables when you take the actual exam. You should also use this material when taking the practice tests in this book. ABOUT THE TEST The Advanced Placement Chemistry Examination is offered each May at participating schools and multi-school centers throughout the world. The Advanced Placement Program is designed to allow high school students to pursue college-level studies while attending high school. The participating colleges, in turn, grant credit and/or advanced placement to students who do well on the examinations. The Advanced Placement Chemistry course is designed to be the equivalent of a college introductory chemistry course, often taken by chemistry majors in their first year of college. Since the test covers a broad range of topics, no student is expected to answer all of the questions correctly. The exam is divided into two sections: 1) Multiple-choice: Composed of 75 multiple-choice questions designed to test your ability to recall and understand a broad range of chemical concepts and calculations. This section constitutes 45% of the final grade and you are allowed 90 minutes for this portion of the exam. Calculators are not permitted for this section of the exam. 2) Free-response section: Composed of several comprehensive problems and essay topics. This section constitutes 55% of the final grade and the student is allowed 90 minutes for this portion of the exam. You may choose from the questions provided. These problems and essays are designed to test your ability to think clearly and to present ideas in a logical, coherent fashion. You can bring an electronic hand-held calculator for use on the 40-minute free-response section. Essay and chemical-reaction questions comprise the last 50 minutes of the test, during which calculators are not permitted. A final note about calculators: Most hand-held models are allowed in the test center; the only notable exceptions are those with typewriter-style (QWERTY) keypads. If you are unsure if your calculator is permitted, check with your teacher or Educational Testing Service. SCORING The multiple-choice section of the exam is scored by crediting each correct answer with one point, and deducting only partial credit (one-fourth of a point) for each incorrect answer. Omitted questions receive neither a credit nor a deduction. The essay section is scored by a group of more than 1,000 college and high school educators familiar with the AP Program. These graders evaluate the accuracy and coherence of the essays accordingly. The grades given for the essays are combined with the results of the multiple-choice section, and the total raw score is then converted to the program's five-point scale: 5 - Extremely well qualified 4 - Well qualified 3 - Qualified 2 - Possibly qualified

EVERYTHING YOU NEED TO HELP SCORE A PERFECT 5. Equip yourself to ace the AP Chemistry Exam with this comprehensive study guide--including 4 full-length practice tests, thorough content reviews, targeted strategies for every section, and access to online extras. Techniques That Actually Work. - Tried-and-true strategies to help you avoid traps and beat the test - Tips for pacing yourself and guessing logically - Essential tactics to help you work smarter, not harder Everything You Need to Know to Help Achieve a High Score. - Fully aligned with the latest College Board standards for AP Chemistry - Comprehensive content review for all test topics - Engaging activities to help you critically assess your progress - Access to study plans, a handy list of key equations, helpful pre-college information, and more via your online Student Tools account Practice Your Way to Excellence. - 4 full-length practice tests (3 in the book, 1 online) with detailed answer explanations - Practice drills at the end of each content chapter - Review of important laboratory procedures and equipment

EVERYTHING YOU NEED TO HELP SCORE A PERFECT 5, WITH THE BEST PRACTICE ON THE MARKET! Equip yourself to ace the AP Chemistry Exam with this comprehensive study guide--including 7 full-length practice tests (the MOST full-length tests on the market!), thorough content reviews, targeted strategies for every section, and access to online extras. Techniques That Actually Work. - Tried-and-true strategies to help you avoid traps and beat the test - Tips for pacing yourself and guessing logically - Essential tactics to help you work smarter, not harder Everything You Need to Know to Help Achieve a High Score. - Fully aligned with the latest College Board standards for AP Chemistry - Comprehensive content review for all test topics - Engaging activities to help you critically assess your progress - Access to study plans, a handy list of key equations, helpful pre-college information, and more via your online Student Tools account Premium Practice for AP Excellence. - 7 full-length practice tests (5 in the book, 2 online) with detailed answer explanations - Practice drills at the end of each content review chapter - Review of important laboratory procedures and equipment

Provides techniques for achieving high scores on the AP chemistry exam and includes two full-length practice tests, a subject review for all topics, and sample questions and answers.
