wildlife tour. Witness rare species in picturesque natural landscapes such as the black-necked crane, red pandas and langurs.

Birds of Bhutan: Wildlife Tour

On the outskirts of Thimphu, we spot a beautiful dark blue bird – a whistling blue thrush, very common in Bhutan. The road winds through miles and miles of pristine forests of pine, cypress, oak and other large trees. Admiration comes with a touch of jealousy: they have conserved well. But then, they have only 700,000 mouths to feed.

The extensive wetlands, grasslands and woodlands of Kaziranga also provide vital habitat for numerous bird species (many of which will not be seen in Bhutan), including such specialities as Swamp Francolin, Slender-billed Vulture, Bengal Florican, Blue-naped Pitta, Slender-billed Babbler, and Bristled and Indian Grassbirds.

The nation of Bhutan and the Indian states of Sikkim and Arunachal Pradesh together form the eastern arm of the Himalayas. This book is the definitive field guide to the birds of this magical corner of Asia. Covers all 809 species that regularly occur in the region, including most vagrants. 152 superb colour plates, with text on facing pages for quick and easy reference. Concise text covering identification, voice, habits, habitats, distribution and status. Introduction includes information habitats, birding sites and conservation.

This book is a major contribution to the ornithology of the Himalayan region. It is the first detailed guide to Bhutan and will prove an invaluable field reference for anyone birdwatching in

this beautiful country.

A successor to *Birds of the Indian Subcontinent*", by the same authors, this handbook explores the birdlife of northern India and Pakistan. The plates are accompanied by text that highlights the identification, voice, habitat, altitudinal range, distribution and status of the birds. The text is on pages facing the plates for easy reference, and there are distribution maps for every species."

This book is the definitive field guide to the birds of this magical corner of Asia. Covers all 809 species that regularly occur in the region, including most vagrants. 152 superb colour plates, with text on facing pages for quick and easy reference. Concise text covering identification, voice, habits, habitats, distribution and status. Introduction includes information habitats, birding sites and conservation.

This is the only comprehensive photographic field guide to the birds of the entire Indian subcontinent. Every distinct species and subspecies—some 1,375 in all—is covered with photographs, text, and maps. The guide features more than 4,000 stunning photographs, many never before published, which have been carefully selected to illustrate key identification features of each species. The up-to-date facing-page text includes concise descriptions of plumage, voice, range, habitat, and recent taxonomic changes. Each species has a detailed map reflecting the latest distribution information and containing notes on status and population density. The guide also features an introduction that provides an overview of birdlife and a brief history of ornithology in India and its neighbors. The result is an encyclopedic photographic guide that is essential for everyone birding anywhere in the subcontinent. Covers all 1,375 subcontinental bird species Features more than 4,000 stunning photographs to aid quick field identification Includes up-to-date facing-page text and range maps Contains concise descriptions of plumage, voice, habitat, and much more

Birdwatchers have long waited for a comprehensive and up-to-date identification guide for the Indian subcontinent. This exhaustively researched and beautifully produced book will finally meet that need. Written by three leading experts on the region--Richard Grimmett, Carol Inskipp, and Tim Inskipp--the book provides complete information about the 1,300 species of birds found in India, Pakistan, Nepal, Bangladesh, Bhutan, Sri Lanka, and the Maldives. The guide is firmly rooted in the authors' extensive field experience, reflected in the accuracy and fullness of their bird descriptions. The guide features more than 150 color plates by eminent bird illustrators from Europe and India that depict all the species in the region, ranging from the Himalayan Snowcock in the north to the Sri Lanka Spurfowl in the south. The plates include all relevant identifiable subspecies, as well as ages and sexes. The text consists of a detailed identification section, discussing the differences between similar species and containing descriptions of vocalizations, habits, habitat, breeding, distribution, and status. There are distributional maps for nearly all species. And the authors' introduction provides useful background information about such subjects as conservation, the history of ornithology on the subcontinent, and the climate. A detailed bibliography provides an introduction to the prolific literature on the subcontinent. This is a landmark publication that will be enthusiastically welcomed by all birdwatchers with an interest in the extraordinary variety of birds in this vast and diverse region.

Periplus is proud to present the first comprehensive photographic guide to the birds of the Indian subcontinent. This ebook offers over 800 species and distinct sub-species and contains over 1,000 full-color photographs. Each species has a distribution map. Many of the photographs in this magnificent volume appear for the first time and have been carefully selected to show the most important features of the species illustrated. In several cases, different plumages or flight shots are included. The concise text provided vital information on the plumages, voice and habits of each species covered and includes new information. Over a hundred related species are also mentioned in the texts. The maps are accompanied by a note on the status and distribution. This ebook will enable accurate field identification in one of the world's most diverse avifaunal regions. Indispensable reading for all bird lovers.
