The automotive industry appears close to substantial change engendered by “self-driving” technologies. This technology offers the possibility of significant benefits to social welfare—saving lives; reducing crashes, congestion, fuel consumption, and pollution; increasing mobility for the disabled; and ultimately improving land use. This report is intended as a guide for state and federal policymakers on the many issues that this technology raises.

developed countries are crucial in exploring and understanding the challenges of the future. This volume focuses on the key questions for all business: What are the new realities? What new policies are required of companies and executives in order to deal with these changes. Facing a whole swathe of issues head-on in his usual clear-sighted style, Drucker offers up a prescient and informed analysis that will help every executive to build a proactive strategy for the future.
