Automotive Automatic Transmission and Transaxles, published as part of the CDX Master Automotive Technician Series, provides students with an in-depth introduction to diagnosing, repairing, and rebuilding transmissions of all types. Utilizing a "strategy-based diagnostics" approach, this book helps students master technical trouble-shooting in order to address the problem correctly on the first attempt.

How do the rich get rich? An updated edition of the "remarkable" New York Times bestseller, based on two decades of research (The Washington Post). Most of the truly wealthy in the United States don't live in Beverly Hills or on Park Avenue. They live next door. America's wealthy seldom get that way through an inheritance or an advanced degree. They bargain-shop for used cars, raise children who don't realize how rich their families are, and reject a lifestyle of flashy exhibitionism and competitive spending. In fact, the glamorous people many of us think of as "rich" are actually a tiny minority of America's truly wealthy citizens--and behave quite differently than the majority. At the time of its first publication, The Millionaire Next Door was a groundbreaking examination of America's rich--exposing for the first time the seven common qualities that appear over and over among this exclusive demographic. This edition includes a new foreword by Dr. Thomas J. Stanley--updating the original content in the context of the financial crash and the twenty-first century. "Their surprising results reveal fundamental qualities of this group that are diametrically opposed to today's earn-and-consume culture." --Library Journal

From 1963 to 1974, muscle cars were the kings of the road--no other American automobiles have ever inspired as much passion as these classic performance cars. Muscle Car Source Book is a one-stop resource for muscle car fans. Heavily illustrated with vivid color photography of all the muscle cars from the classic era (1963-1974) and chock full of data and historical facts, this is a reference book you will not want to put down! All of the manufacturers--Ford, Chevrolet, Pontiac, Buick AMC, Dodge, and Plymouth--are covered, and so are the cars, including the Camaro, Mustang, Charger, GTO, and many more! Statistics: All the performance data available for each car is presented in easily read tables. Specifications: Detailed specifications, including horsepower and torque ratings, curb weight, fuel capacity, stock wheel and tire sizes, and other key technical data unique to each model is given. Production numbers: Production information is broken down across all the performance variants and major features. Options: Major performance options available for each car including engine options, comfort features, gauge packages, and wheel-and-tire options are all outlined.

Explains the workings of automobile brake systems and offers advice on the installation, testing, maintenance, and repair of brakes

A vital guide to the frontlines of our fight against climate change and the scientific and technological innovations that will revolutionize the world. The United States' accelerated plans to combat the existential threat of climate change finally give reason to hope. In Our Livable World, research specialist and author Marc Schaus explores the incredible new green innovations in science and engineering that can allow us to avoid the worst repercussions of global warming as we work to usher in a sustainable, livable world. To beat a challenge the size of climate change, our solutions will have to be ambitious: solar thermal cells capable of storing energy long after the sun goes down, "smart highways" designed to charge your vehicle as you drive, indoor vertical farms automated to maximize crop growth with no pesticides, bioluminescent vines ready to one day replace our streetlights, jet fuel created from landfill trash--and next-generation carbon capture techniques to remove the emissions we have already released over the past several decades. Far from the geoengineering schemes of cli-fi action thrillers, real solutions are being developed, right this moment. Our Livable World features interviews with the innovators, real talk on the revolutionary technology, and a clear picture of a cleaner planet in the future. "An important book that shows the dawn of a new kind of environmental movement--an age where we invest in deeply creative and fascinating technical solutions that work in harmony with the Earth. Marc Schaus lays out the exciting future of environmental innovation before us." --Katie Patrick, author of How to Save the World

Rising to Power is a time tested, wisdom-packed guide for executives desiring to be exceptional leaders as they navigate their ascent to the highest levels of their organization. Nearly two-thirds of all leaders entering executive roles lack sufficient understanding of what is required and are unprepared for what they will face, which explains why 50 percent of them fall within the first eighteen months. For decades we have known that failure rates among transitioning executives are too high, causing exorbitant costs, damaged organizations, and stalled careers. Still, little has changed in the way organizations prepare leaders to assume executive positions. Three-fourths of new executives say their organization did not adequately prepare them for the executive office. It doesn't have to be this way. If you are an executive--or you're aspiring to be one--and considering how you will navigate the ascent in your organization, Rising to Power will serve you like no other resource can. Odds are high you have watched a promising executive fail on their way up. Like many, you scratched your head, wondering, "Why didn't they see that coming?" Now you're hoping not to be the next one that fails. Rising to Power will guide you on a predictable journey of ascent, through the transitional moments and issues most common in executive failure. It will bolster your confidence, open your eyes, deepen your insight, and if you let it, reveal your own proclivities for failure that you may not even recognize. Based on a ten-year longitudinal study, Rising to Power offers a profoundly new way of looking at an executive's rise in an organization, and offers an approach to significantly increase your odds of success.

The Complete Book of Ford Mustang, 4th Edition details the development, technical specifications, and history of America's original pony car, now updated to cover cars through the 2021 model year.
