How you can earn remarkable profits right now by trading in very brief time frames!

- Forget 'buy and hold.' Look what it's done to the investors who believed in it!
- Enter the market at very specific times, and structure trades that capitalize on proven pricing anomalies and distortions.
- Master day trading strategies that work in any market conditions, because they don't rely on financial predictions, company results, or market direction. Stock prices have lost all relationship to the underlying performance of the companies they represent: investors who relied on traditional 'buy and hold' strategies have been savaged by the greatest destruction of wealth in the history of the world. But some options traders are earning immense profits right now, even in this generation's worst market and they'll keep profiting no matter how the market moves. How? They trade at very specific times and structure trades to capitalize on well-characterized pricing anomalies and distortions. By doing so, they can generate more profit in one day than most experienced investors realize in a month, sometimes even a year. What's more, they systematically minimize exposure to market risk, including potentially disastrous after-hour market moves. In *Day Trading Options*, top options trader Jeff Augen shows exactly how you can use these strategies, too. You'll learn why day trading options is more practical than ever, and understand trends in the options market that have leveled the playing field between large institutions and private traders. Augen reveals how to choose candidates for day trading; use new technical indicators that work; spot mispriced options; exploit rapid changes in implied volatility, and much more. Above all, you'll learn how to structure positions that close profitably before the end of trading, so end the day wealthier and more secure than you were in the morning. Jeff Augen, currently a private investor and writer, has spent over a decade building a unique intellectual property portfolio of algorithms and software for technical analysis of derivatives prices. His work includes over 1 million lines of computer code reflecting powerful new strategies for trading options. As founding executive of IBM's Life Sciences Computing business, he defined a growth strategy resulting in \$1.2B of new revenue, and managed \$200M in venture investments. His books include *Trading Options at Expiration*, *The Options and The Volatility Edge in Options Trading*. *Trader Workbook*

A comprehensive study companion to *The Options Course, Second Edition* In *The Options Course Workbook, Second Edition*, George Fontanillo offers a wealth of practical exercises that will help further the readers' understanding of options, as well as test and apply what they've learned before they take their first step into the real markets—where time and money are luxuries they cannot afford to lose. This hands-on companion to *The Options Course, Second Edition* includes a complete answer key and covers a wide range of options issues. George A. Fontanillo (Miami, FL) is the President Emeritus of Optionetics, the world leader in Options Education, with offices around the world specializing in teaching high-profit, low-risk, low-stress option trading strategies ([www.optionetics.com](http://www.optionetics.com).) From the Foreword by John J. Murphy "DeMark's work as a consultant has been restricted to large institutions and many of the legendary traders in the world today. By sharing his creative ideas with us, as well as his passion for precision and improvement, Tom DeMark's emphasis on the 'new science' of technical analysis helps push the technical frontier another step forward. With the unprecedented attention now being paid to technical analysis, this new book couldn't have come at a better time." --John J. Murphy, bestselling author of *Technical Analysis of the Futures Markets* and *Intermarket Technical Analysis*, and technical analyst for CNBC "This book is filled with innovative, creative, and clever new ideas on technical analysis. Tom DeMark has done a wonderful job of turning subjective techniques into objective strategies and tactics." --Courtney Smith President and CIO Pinnacle Capital Management, Inc. "Those who know him and his work call him the consummate technician--a trading system developer without peer." --*Futures magazine* "DeMark is the ultimate indicator and systems guy. No one touches him. I know the Holy Grail of trading systems doesn't exist because if it did, Tom would have found it by now." --James Bianco Director of Arbor Trading "Tom DeMark is a genuine leader who has been behind-the-scenes until now. Publishing DeMark is a coup." --Ralph Vince author of *The Mathematics of Money Management*

Douglas uncovers the underlying reasons for lack of consistency and helps traders overcome the ingrained mental habits that cost them money. He takes on the myths of the market and exposes them one by one teaching traders to look beyond random outcomes, to understand the true realities of risk, and to be comfortable with the "probabilities" of market movement that governs all market speculation.

In today's volatile markets, managing risk is more important than ever. Investors are looking for downside protection while maintaining good returns--and market-neutral investing has become one of the hottest methods to meet that need. In this book, industry expert Joseph G. Nicholas explores new approaches to return enhancement and risk reduction through market-neutral strategies. Market-neutral investments are attractive because they have produced substantially better risk-adjusted returns than the market during the past ten years. The complexities created by the combination of longs, shorts, and leverage, however, make market-neutral strategies very different from conventional investments. Getting to know how these strategies work involves breaking them down into their basic components and then examining how those parts interact as a system with specific behavior characteristics. This book examines eight key strategies, revealing the source of their past returns and giving the investor tools with which to measure the possibility of repeat performance. Nicholas draws extensively on his company's database of over three thousand hedge funds and from the daily portfolio analysis conducted for hedge fund portfolios. He has also incorporated extensive input and actual investment examples provided by managers and practitioners of each of the strategies discussed in the book. This is the one book that looks at market-neutral strategies head-on, assessing those that have worked and some notable ones that have failed--and explaining why. Clear, insightful, and illustrated with numerous charts and graphs, *Market-Neutral Investing* is an invaluable guide for professional investors.

In praise of Charlie D. "Falloon's eloquent explication of the life of the legendary Charlie D delivers a good read while exposing that most under-publicized commodity of them all-a mega-trader with a low public profile whose superhuman trading abilities were exceeded by only one thing-the extended reach of his heart and soul." -Patrick H. Arbor Chairman, Chicago Board of Trade "Charlie D. is a tribute to the entrepreneurial spirit of Charlie D, whose legend still lives today on our trading floors. It also captures the essence of the men and women of Chicago who, working in a unique environment, through their trading provide economic benefits around the world." -Thomas R. Donovan President and Chief Executive Officer Chicago Board of Trade "Charlie D was unique-a poker-faced, unemotional, swashbuckling trader every other trader seeks to emulate. At the same time, he was also a model of trading integrity and one of the most generous people I have ever known. Whether trading or gambling, vacationing with family or going with superstars, he did everything with a special flair and spirit. Charlie was truly larger than life." -Thomas DeMark Author of The New Science of Technical Analysis and New Market Timing Techniques "Falloon captures the essence of the Charlie D I knew and rekindles my memories of a larger-than-life individual-how he laughed in the face of cancer, his generosity, and his sense of humor." -Mike Manning Rand Financial Services, Inc. "Charlie D was the most dynamic trader I've ever seen in my nineteen years in this business, and, beyond that, the best human being I've known." -Tom Fitzgerald TPF Trading
