Recommends techniques for raising money for nonprofit organizations from government agencies, foundations, corporations and other sources and describes how to organize special fund raising events

This volume presents a wide range of new approaches aimed at improving the safety and quality of food products and agricultural commodities. Each chapter provides in-depth information on new and emerging food preservation techniques including those relating to decontamination, drying and dehydration, packaging innovations and the use of botanicals as natural preservatives for fresh animal and plant products. The 28 chapters, contributed by an international team of experienced researchers, are presented in five sections, covering: Novel decontamination techniques Novel preservation techniques Active and atmospheric packaging Food packaging Mathematical modelling of food preservation processes Natural preservatives This title will be of great interest to food scientists and engineers based in food manufacturing and in research establishments. It will also be useful to advanced students of food science and technology.

Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.

DigiTech's latest, the GNX4 guitar workstation, is an extremely clever box. It combines signal processing, RAM recording, a computer interface, drum machine, MP3/MIDI sequence playback, a MIDI interface, and more...

Treatment of the Neurologically Impaired Adult With the present book, acclaimed international Bobath instructor and therapist Bente Gjelsvik offers an evidence-based practice-oriented road map to the assessment and treatment of patients with lesions of the central nervous system. Consisting of 238 pages of accessible text supported by 240 illustrations (mostly photographs of patients in therapy), this work is the ideal clinical guide for physical and occupational therapists, for students and practitioners working with neurologically impaired adults, and for Bobath instructors as well as trainers in physiotherapy in general. Gjelsvik successfully bridges the gap between evidencebased clinical practice and theoretical assumptions, developing a clear understanding of the neuromusculoskeletal system, of motor control, of neural and muscle plasticity, and ultimately of the

structure and function of the organism as a whole. The fine balance between theoretical information, clinical relevance, and practical examples make this an essential book for learning all about the interaction between the central nervous system, the musculoskeletal system, movement, and function. Bente Gjelsvik thus improves any Bobath therapist's competency in achieving the best possible assessment of the individual with neurological conditions, for best possible results of the treatment.

ADAM Luxury yacht, tropical seas, babes in bikinis...dream job, right? Wrong. The passengers are rich jerks who treat the crew like garbage, when they aren't pretending we're their whores. The best day was when that cokehead heiress Kalina tried to fire me just for doing my job. I swore I'd never go back home to my parents and their crazy fundamentalist ranch in the desert, but nothing could be worse than this. And then the pirates attack. KALINA Luxury yacht, tropical seas, billionaire boyfriend...dream trip, right? Wrong. After catching my man getting "extra services" from the maid, I know I'm the laughingstock of passengers and crew. Every time I lay eyes on that quiet, handsome deckhand Adam, I can feel him judging me. I want to die, and when the pirates show up, I think I'm going to. But Adam... he saves me. Now we're alone together on a lifeboat in the open ocean. Adam thinks we don't have a chance, but thanks to him, we've made it this far. And then, in the distance, I spot an island...
