A comprehensive guide to creating and developing comic book and graphic novel art, from the Savannah College of Art and Design (SCAD), one of the world's leaders in sequential arts instruction. John Lowe, Dean of the School of Communication Arts at SCAD, presents an in-depth primer on the tools and techniques used by top sequential artists to crate comic books, graphic novels, and other sequential art forms. Based on SCAD's world-famous sequential arts curriculum with examples of professional comic book art from their faculty and alumni, the book uses detailed instruction and step-by-step examples to teach key artistic methods like sketching, thumbnailing, reference gathering, and using production/digital design methods. This book covers all the materials and methods aspiring artists need to master to make it as sequential artists.

This beginner's guide to drawing in graphite pencil uses step-by-step exercises to teach fundamental methods for rendering all aspects of the natural landscape, with additional lessons on using charcoal, colored pencil, pastel, and other media. Following in the footsteps of author, artist, and art instructor Suzanne Brooker's previous title The Elements of Landscape Oil Painting, this book pairs the most universally-pursued topic for artists (drawing) with the popular subject matter of the natural landscape. Brooker breaks down landscapes into their various elements--including the earth, water, air, and trees--to convey how the fundamentals of drawing are applied to capture each aspect. Using the graphite pencil as her baseline instrument, Brooker provides you with step-by-step lessons that help you improve your rendering skills and re-create the beauty of the world outdoors. Examples from art history and contemporary masters supplement these lessons. The end result is a drawing instruction book that provides artists with everything they need to render landscapes no matter their skill level.
