Are you currently on the ketogenic diet or are you considering it? I strongly recommend that you plan your meals before starting the diet or start now if you have had difficulty following the ketogenic diet. Why is this? Because planning is the first step to success! How to use the keto meal planner: B: Breakfast L: Lunch D: Dinner S: Snacks 1. Take the time to think about the keto-friendly meals you want to make during the following week. Calculate the calories and carbs per serving (Most food blogs also add the nutritional info for their recipes). Add them to your meal planner. (Don't forget to account for snacks too! A bulletproof coffee also has calories, even though it's keto-friendly!) Estimate the number of calories and carbs for that day and write it down. 2. Check off your water intake for the day! Drinking enough water is very important when you do the ketogenic diet. It should be your goal to check off all three boxes by the end of the day. This will assure you are properly hydrated. (Also only an estimate, some people may even need more or less water. If you do a workout, you also need more!) 3. Notes: Write down thoughts about your diet. Got joint pain? Maybe you need to eat less meat and more leafy greens. Have problems with constipation? Maybe you need to increase your fiber intake. Write down your problems or feelings and analyze what you could do better. 4. Groceries: Write down stuff you need for next weeks meals!
