Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America ' s premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede ' s wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid ' s, handle like a pro ' s. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension ' s condition. He outlines testing procedures that will help you gauge how well you ' re improving your suspension, along with your riding. And, if you ' re inclined to perfect your bike ' s handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

Since length of stay in hospitals continues to decrease, and insurance companies focus on documentation for reimbursement, it is vital for recreation professionals to master documentation issues -- especially those of writing goals and objectives with their patients and clients. Well-written goals and objectives keep treatment on target and measurable, and assist with justification of services. This manual offers basic techniques that students, interns, and entry-level professionals need to gain confidence when developing and writing goals and objectives with their clients and patients. The exercises and case studies in this manual offer scenarios to help users build confidence by practicing the fundamentals of better documentation which will serve patients and clients, recreation therapists, hospitals, community settings, and outside reviewing organizations.
