Diagnostics, or fault finding, is a fundamental part of an automotive technician's work, and as automotive systems become increasingly complex there is a greater need for good diagnostic skills. Advanced Automotive Fault Diagnosis is the only book to treat automotive diagnostics as a science rather than a check-list procedure. Each chapter includes basic principles and examples of a vehicle system followed by the appropriate diagnostic techniques, complete with useful diagrams, flow charts, case studies and self-assessment questions. The book will help new students develop diagnostic skills and help experienced technicians improve even further. This new edition is fully updated to the latest technological developments. Two new chapters have been added – On-board diagnostics and Oscilloscope diagnostics – and the coverage has been matched to the latest curricula of motor vehicle qualifications, including: IMI and C&G Technical Certificates and NVQs; Level 4 diagnostic units; BTEC National and Higher National qualifications from Edexcel; International Motor Vehicle qualifications such as C&G 3905; and ASE certification in the USA.

Human beings are inherently sensual. We all share the want and need to indulge in a thirst until no longer thirsty. We want to feel the sensation of a soft touch that makes the body vibrate. We long for satisfaction that feeds the soul with warmth, be it physical or emotional. Skye is a bit na've when it comes to relationships. Montgomery is the on again, off again love of her life. Chelsea is the new age college roommate, while Terri is emotional, plain and simple. How will they navigate the world of love, lies, lust, and heartache? They are each swept up in a whirlwind of confusion. Is Skye the innocent damsel in the distress she first appears, or is she a sexually charged vixen? Lines are blurred as Skye takes on men and women in a world of erotic and mind-boggling relationships. Lust has a way of fooling people into thinking it's love, and as lust becomes Skye's fixation, who will pay the highest price: the lover, the cousin, or the wife?

In the 1950s and 1960s, luxury car buyers, from government ministers to captains of industry, almost invariably bought British. These were stately, dignified, and grand vehicles, with many featuring leather interiors and wood trim. Unfortunately, that market has now largely disappeared and, with it, so have the car-makers themselves. This new book covers cars in the over-3-litre class from the biggest names in British luxury motoring including Alvis, Daimler, and Lagonda, and high-end models from Austin, Rover, and Jaguar. It examines the features and characteristics of these classic cars, as well as explaining why they fell from prominence in the 1970s. Replete with beautiful photography throughout, this book is a loving portrait of the British luxury car, a dearly missed saloon defeated by foreign imports.
