Productivity growth in the Turkish agricultural sector is supported today by better technologies, crop varieties and animal breeds. Yet improvements have

slowed since the late 2000s, and the productivity gap between agriculture and the rest of the economy remains large.

Education in science, technology, engineering and mathematics (STEM) is crucial for taking advantage of the prospects of new scientific discoveries initiating or promoting technological changes, and managing opportunities and risks associated with innovations. This book explores the emerging perspectives and methodologies of STEM education and its relationship to the cultural understanding of science and technology in an international context. The authors provide a unique perspective on the subject, presenting materials and experiences from non-European industrialized as well as industrializing countries, including China, Japan, South Korea, India, Egypt, Brazil and the USA. The chapters offer a wide scope of interpretations and comparative reviews of STEM education by including narrative elements about cultural developments, considering the influence of culture and social perceptions on technological and social change, and applying innovative tools of qualitative social research. The book represents a comprehensive and multidisciplinary review of the current status and future challenges facing STEM education across the world, including issues such as globalization, interdependencies of norms and values, effects on equity and social justice as well as resilience. Overall the volume provides valuable insights for a broad and comprehensive international comparison of STEM philosophies, approaches and experiences.

Freedom of Information: A Practical Guide for UK Journalists is written to inform, instruct and inspire journalists on the investigative possibilities offered by the Freedom of Information Act. Covering exactly what the Act is, how to make FOI requests and how to use the Act to hold officials to account, Matt Burgess utilises expert opinions, relevant examples and best practice from journalists and investigators working with the Freedom of Information Act at all levels. The book is brimming with illuminating and relevant examples of the Freedom of Information Act being used by journalists, alongside a range of helpful features, including: • end-of-chapter lists of tips and learning points; • sections addressing the different areas of FOI requests; • text boxes on key thoughts and cases; • interviews with leading contemporary journalists and figures working with FOI requests. Supported by the online FOI Directory (www.foidirectory.co.uk), Freedom of Information: A Practical Guide for UK Journalists is a must read for all those training or working as journalists on this essential tool for investigating, researching and reporting.

The dramatic shift related to God's Holy Spirit that occurred on the Day of Pentecost, immediately following Christ's death and ascension to heaven. God's actions on that day were a monumental event in human history and in His great master plan of salvation. God's Holy Spirit was poured out and made available, not just to the disciples and Israel, but to nations far off and to all that God may call. Through His Spirit, God works for us and through us to bring us into His Kingdom. 1 Corinthians 12:7 NIV: Now to each one the manifestation of the Spirit is given for the common good. Jesus said in John 14:12 NIV, : Very truly I tell you, whoever believes in me will do the works, I have been doing, and they will do even greater things than these, because I am going to the Father.

When God created man in His own image. He purposed that mankind (both man and woman) would resemble God in certain ways and share certain characteristics of His divine nature. God loves and values life. He knew us all before we were even born, God has a purpose and a destiny for every one of our lives. Your knowledge or lack of knowledge concerning this truth does not alter the fact that God has a purpose and a destiny for your life. So how can I discover and fulfil my God-given destiny? – Before we were even born – God ordain our days and then “knitted” us together in the womb. “Made in God’s Image,” All parents are to dedicate their time to teach their children when they are still young about definition of “destiny.” Destiny is defined as, “A

course or path in life, that includes both the God-given destination you are seeking at life's end, and your own faith-filled journey toward that destination. Children will learn that even though all people are made in God's image, God deliberately made them individually unique as wonderful and beautiful to displays of his power and glory. Ecclesiastes 12.1 NIV: Remember your Creator in the days of your youth, before the days of trouble come. 1. Know that we all have a God-given destiny. 2. Know that our destiny can be life changing. 3. Know that our destiny keeps us motivated, being led by The Holy Spirit always.

This peer review of United Kingdom reviews its development policies and programmes. It assesses not just the performance of its development co-operation agency, but also policy and implementation.

- Minerals Yearbook, 2014, V. 3: Area Reports: International: Asia and the Pacific. Volume III, Area Reports: International, is published as four separate reports. These regional reports contain the latest available minerals data on more than 180 foreign countries and discuss the importance of minerals to the economies of these nations and the United States. Each report begins with an overview of the region's mineral industries during the year. It continues with individual country chapters that examine the mining, refining, processing, and use of minerals in each country of the region and how each country's mineral industry relates to U.S. industry. Most chapters include production tables and industry structure tables, information about Government policies and programs that affect the country's mineral industry, and an outlook section.

This book explores the relationship between space, subjectivity and property in order to invert conventional socio-legal understandings of property. Sarah Keenan demonstrates that new political possibilities for property may be unveiled by thinking about property in terms of space and belonging, rather than exclusion. Drawing on feminist and critical race theory, this book shifts focus away from the propertied subject and on to the broader spaces in and through which the propertied subject is located. Using case studies, such as analyses of compulsory leases under Australia's Northern Territory Intervention and lesbian asylum cases from a range of jurisdictions, Keenan argues that these spaces consist of networks of relations that revolve around belonging: not just belonging between subject and object, as property is traditionally understood, but also the less explored relation of belonging between the part and the whole. This book therefore offers a conceptually useful way of analysing a wide range of socio-legal issues. It will be of relevance to those working in the area of property and legal geography, but also to those with more general interests in socio-legal studies, social and political theory, postcolonial studies, critical race studies and gender and sexuality studies.

The Direction of Trade Statistics Online service provides data on the value of merchandise exports and imports between each country and all its trading partners. The database includes: total bilateral and multilateral exports and imports aggregated at national or regional group level; data from 1948 at monthly, quarterly, and annual frequencies.

The Small Arms Survey 2015 examines the role of weapons and armed violence in humanity's appropriation of the earth's wildlife and mineral riches - in Africa, where the poaching of elephants and rhinos is becoming increasingly militarised, and near resource extraction sites around the world. In addition to presenting updates on the UN small arms process and the top arms importers and exporters, the volume assesses how recent technological developments affect weapons marking, record-keeping, and tracing; reviews small arms flows to Egypt, Libya, and Syria; and evaluates a stockpile management initiative

in south-east Europe. The 'armed actors' section sheds light on the arms and ammunition used by insurgents in northern Mali, the decline of the Forces Démocratiques de Libération du Rwanda, and the use of floating armouries by private security companies in the Indian Ocean. This edition also analyses conditions that are driving young people to adopt high-risk coping strategies in Burundi.
