Cardiac arrest is a clinical diagnosis: • Suspect cardiac arrest in any patient who is unconscious and who does not have signs of life. If you check a pulse, examine only for a major (carotid or femoral) one and take no longer than 10sec. Other ‘confirmatory’ clinical features (eg colour, pupil size/response) waste time and do not help.

This book is primarily for pediatric and adult emergency room physicians, primary care providers, hospitalists, and nurses. It will also be useful for critical care specialists, cardiologists and trainees at all levels. Cardiac Emergencies in Children describes the pathophysiology of a diverse group of congenital and acquired heart conditions and presents a therapeutic rationale for treating children presenting with these conditions under life-threatening conditions. The book discusses the effects of surgery on hemodynamics and how to manage these effects. Also described are the daily challenges faced by physicians, including identifying a child with heart disease, interpreting chest radiographs, ECGs, and laboratory findings, and beginning appropriate therapies.

Fully revised and updated, the Oxford Handbook of Emergency Medicine is the definitive, best-selling guide for all of the common conditions that present to the emergency department. Whether you work in emergency medicine, or just want to be prepared, this book will be your essential guide. Following the latest clinical guidelines and evidence, written and reviewed by experts, this handbook will ensure you are up to date and have the confidence to deal with all emergency presentations, practices, and procedures. In line with the latest developments in the field, such as infection control, DNR orders, advanced directives and learning disability, the book also includes new sections specifically outlining patient advice and information, as well as new and revised vital information on paediatrics and psychiatry. For all junior doctors, specialist nurses, paramedics, clinical students, GPs and other allied health professionals, this rapid-reference handbook will become a vital companion for both study and practice.

As physicians, we have a constant passion for improving and maintaining patient's care and safety. The book is divided into three parts focusing on the essentials of general concepts, diagnosis, and management of accident and emergency medicine, as well as an academic approach to teaching in the emergency setting. The chapters selected for this book are written by an excellent group of recognized emergency surgeons and physicians from different countries and cultures facilitating a comprehensive and interesting approach to the problems of emergency treatment. We hope this book will be helpful and used worldwide by medical students, clinicians, and researchers enhancing their knowledge and advancing their objectives by a book that intends to become a reference text for research and practice within accident and emergency medicine.

First responders play a critical role in managing chest pain and out-of-hospital cardiac arrest. On-scene 12 lead ECG can provide critical pre-hospital alerts for mobilizing medical services. Such alerts can reduce treatment delays, most importantly, cardiac catheterization resources - the optimal reperfusion strategy for myocardial infarction. This manual introduces the Primary Survey Approach to quickly identify life-threatening cardiac emergencies including STEMI and NSTEMI events.

Emergency medicine textbook on identifying and treating cardiac emergencies, includes interpretation of ECGs, use of ultrasound in diagnosis, identification of arrhythmias, shock, syncope, post-arrest syndrome and much more.

This book describes all aspects of the management of cardiopulmonary arrest in both adults and children. The management of life-threatening cardiac emergencies, including myocardial infarction and various arrhythmias is also described in detail. This book will be useful to all those doctors, nurses, and paramedics working in the front line of medicine who are expected to respond promptly and effectively to such emergencies.
