Practical | puts key information in clinical context Portable | fits easily into your bag Integrated | referenced back to Neale's Disorders of the Foot 8E so the two work together

This text is designed as a reference for students and professionals within podiatry and chiropody. Suitable for undergraduates, the book aims to help them pass exams and provides them with an overview of the scope of podiatry practice - the pathology and presenting features of the common conditions encountered, their diagnosis and management, and related therapeutics. The structure of the book makes it suitable for use both as a reference book and as a revision text.

The eagerly awaited new edition of Clinical Skills in Treating the Foot has been revised and updated with the needs of a broad range of health professionals in mind. For anyone treating patients with foot disorders, Clinical Skills in Treating the Foot will provide invaluable support through three key areas: Section 1 is concerned with the general principles of managing foot disorders and the context in which treatment of the foot takes place. Included are chapters on treatment planning, evidence based practice, governance and audit, clinical protocols, clinical emergencies and health promotion. Section 2 examines the application of clinical therapeutics to foot disease and includes chapters on operative techniques, surgery and the foot, pharmacology, physical therapy, mechanical therapeutics, chairside devices, prescription devices and footwear therapy. Section 3 considers the particular needs of special groups and includes chapters on the adult foot, the child's foot, sports injuries and management of tissue viability. With its clarity of text and liberal use of case studies and illustrations, the latest edition of Clinical Skills will be required reading for practising and student podiatrists. It will also be a valuable reference and guide for all others involved in the provision of treatment of the foot. This book has been written as a companion volume to the editors' Assessment of the Lower Limb, also published by Elsevier Churchill Livingstone. Written by an experienced team of clinicians who also understand the needs of students as well as practitioners Logical and clear structure makes it easy to use for both clinicians and students Each chapter is self-contained and can be used for independent reading topics Case histories and clinical comment sections illustrate important clinical points Key points and summaries provides assistance for learning and review Features approximately 400 illustrations Hall of the contributors are new - more experienced clinicians than those used for the previous edition New chapter by new author on Clinical Governance (replacing old chapter of Audit and Outcome Measurement) Major revision by new authors of chapter on Treatment Planning to reflect new developments and changes in practice Completely rewritten chapter by new authors on Clinical protocols Major revision by new author of the chapter on Foot health education and promotion Major rewrites with new author of the chapter on Pharmacology which will have expanded sections on topical and injected steroids and prescription medicines. Major revision by new authors of the chapter on Physical therapy New section on chairside devices in the chapter on Mechanical therapeutics in the clinic (new authors involved) Chapter on Prescription orthoses now replaced with new chapter by new authors on Prescription devices.. Major rewrite by new author of the chapter on sports injuries New chapter on Managing tissue viability repaces the old chapter on the Management of foot ulcers and now incorporates the material previously covered in old appendices 1 and 2 on Management of exudation in ulcers and Footcare advice for people with diabetes.

Throughout the 1980s and 1990s, the author's family lived aboard a 47-foot sailboat, spending their summers along the U.S. East Coast and their winters in the Bahamas. As an adult, she lived aboard her own 28-foot sailboat and had several relationships trying to find someone who wasn't intimidated by her stubborn independence and free-spirited lifestyle.

Merriman's Assessment of the Lower Limb has established itself through two editions as the benchmark text book of lower limb examination and assessment. The third edition preserves the lucidity, logical approach and comprehensive coverage of its predecessors but adds many exciting features, including online resources (videos and images), many new contributors, thorough updating of all chapters | many of which have been completely rewritten | and an entirely new chapter on functional assessment. The online resources (access via http://booksite.elsevier.com/9780080451077) provide extensive videos of assessment techniques and illustrations: practitioners with patients and models show how to assess all parts of the lower limb, and evaluate various conditions. Together with its companion volume Clinical Skills in Treating the Foot, the new third edition of Merriman's Assessment of the Lower Limb is a truly indispensable guide for podiatry students and practitioners, as well as trainee general practitioners, medical students working in rheumatology, diabetology and orthopaedics, sports therapists and sports medicine trainees. Online resources incorporating videos and illustrations: invaluable footage of assessment techniques downloadable full colour figures and extra radiological photographs Log on to http://booksite.elsevier.com/9780080451077 and follow the on-screen instructions. Many new contributors bringing fresh expertise and insights for today's student All chapters thoroughly rewritten and updated New chapter on functional assessment Case histories help put learning in context
