tasks as precise as biological systems. To assess the current work and future promise of the biology-materials science intersection, the Department of Energy and the National Science Foundation asked the NRC to identify the most compelling questions and opportunities at this interface, suggest strategies to address them, and consider connections with national priorities such as healthcare and economic growth. This book presents a discussion of principles governing biomaterial design, a description of advanced materials for selected functions such as energy and national security, an assessment of biomolecular materials research tools, and an examination of infrastructure and resources for bridging biological and materials science.

Part celebrity piñata, part scorching social satire, *Boldface Names* is a romp through the land of the rich, the famous and the wicked. In the eye of the party storm is Ravi, a vertically challenged gossip columnist (and self-confessed "tribe-traveller"), who snoops and schmoozes and amasses gift bags. But all hell breaks loose on the glitterosphere when a mysterious D-list starlet is parachuted into Ravi's life for safekeeping, setting off a high-stakes game of secrets and lies. Adding to the drama? The skeleton in Ravi's own closet! Spanning from the beaches of Anguilla to the towers of Dubai, from L.A. to London to the social mines of Toronto, *Boldface Names* stops in at all the hottest tickets: the fashion shows, book shindigs, race-car parties and champagne launches. Adorning the hi-jinks are Govani's laser-sharp observations on human behaviour, social milieus and the machinery of gossip. The wisecracks fly at a Coward-esque pace and the action hums. But be forewarned: no one is safe in *Boldface Names*.

1994–1996. In 1995, there was a major turnaround in Suriname's economic and financial situation following the expansionary fiscal and monetary policies pursued in the first half of the 1990s and the political and economic disruptions of the 1980s. The marked improvement was owing to the restoration of financial discipline, a strengthening of international bauxite prices, and the unification and subsequent stabilization of the exchange rate. The inflation fell further to less than 1 percent in 1996.
