Sony's web site will provide a free owner's manual download, but you'll have to find out the model number. It should be printed on the faceplate, and will probably start with "CDX". Sony has used "Xplod" for their car audio line for at least the last 10 years, and 52x4 is a pretty common power rating for them, too; so you'll need more specific information before you start searching.

The way far too many people at far too many companies think about and execute marketing was born in an era when suppliers-the companies generating products and services-were in the catbird seat. That world is long dead, and customers now occupy that position. In this relentlessly globalizing economy, we live in a world of oversupply and underdemand, with too many suppliers chasing too few customers, offering more goods and services than the market can absorb. Noel Capon set out to discover what differentiates people who know how to succeed in this changed world-people who are able to create customers for the products and services of their business. *The Marketing Mavens* is based on a four-year-long research program that spanned twenty-five industries, identifying long-term winners and what they do differently. Put simply, *Marketing Mavens* place customers at the center of their business and make marketing everyone 's job. Using a wide variety of intriguing, in-depth examples, from ESPN to the Mayo Clinic, Dr. Capon shows how the mavens create customers. How by placing the sports fan at the center of its business, ESPN creates programming that meets the needs of fans that were never given a second thought by the networks; or how physicians at the Mayo Clinic, being both technical experts and skilled at creating a patient-centric ambience, motivate people to pay the extra travel and lodging expenses not covered by insurance. *Marketing Mavens*, though a rare breed, can be found up and down an organization-from the CEO to chief marketing officers to business unit managers. Noel Capon has talked to mavens from across the global economy and brings forth their uncanny insights behind the five imperatives of the true Marketing Maven:

- Picking markets that matter
- Selecting segments to dominate and finding the sweet spot in

that segment • Designing the offer to create customer value and secure differential advantage • Integrating to serve the customer • And measuring what matters Noel Capon in *The Marketing Mavens* redefines marketing, moving it from a focus on selling and communication into a discipline that guides all the key decisions of a business. By seeing marketing as everyone 's business-not the domain of a few specialists-you ' ll get your business in step with the way the world really works . . . and start creating customers. Next year ' s profits don ' t depend on next year ' s numbers but on next year ' s customers. *The Marketing Mavens* points the way to those customers, profits, and an increased stock price.

companies is based on the intangible value of businesses including reputation, goodwill and know how. It is by marketing that reputation can be created and enhanced thus unlocking brand growth. With the use of many examples and case studies the author shows how the five I's process - Insight, Ideas, Innovation, Impact and Investment Return - can be used to create top-line demand-led growth and the tools and techniques available to achieve this. "Pickup" and "sports utility vehicle" seem like quaint names for these workhorses. More and more, they're what people tune up, trick out, and take on the road (or off). This book aims to help drivers make the most of their machines. With 101 projects running the gamut from installing light bars and brush guards to gearing up for hard-core horsepower and high-performance feats, this book will show truck and SUV owners of all stripes how to personalize their rides. 101 Performance Projects for Your Pickup and SUV offers easy-to-follow, clearly illustrated how-to information on everything from appearance modifications to more extensive upgrades, with plenty of instructions for the many bolt-on solutions that are available in the marketplace. Planning, tools, expenses, pros, and cons: it's all here. The author walks owners through the nuts and bolts of lowering and lift kits, running boards and in-car entertainment systems, winches, wheels and tires, and the full range of installations and accessories that will take a truck or an SUV to the next level.

Presenting research in leading edge applications of new technologies in traditional book markets, this book analyses what the commercial opportunities are and how businesses might go about exploiting them. In addition to the education sector, significant opportunities also exist in markets for print handicapped, maps and infotainment.
