This book is published by Floricanto Press.[www.FloricantoPress.com](http://www.FloricantoPress.com) Christopher Columbus wanted to prove he'd reached the edge of India. So, when he returned to Spain in 1493, he brought samples of gold, exotic plants, strange birds, and six Taíno "Indians" to the court of Queen Isabella and King Ferdinand. "Kidnapped by Columbus" is the fictional-largely accurate-historical account of the "Indians" voyage to the Old World told through the eyes of a fourteen-year-old Native American. Columbus and his "Indians" returned to Spain at the height of the Inquisition, in the wake of the expulsion of all Jews and the final defeat of Islam in Europe. The "Indians" encounter some of the most prominent figures in history-Isabella and Ferdinand, Grand Inquisitor Tomás Torquemada, Catherine of Aragón, the ill-fated Prince Juan, and Pope Rodrigo Borgia, who issues

Papal Bulls changing the boundaries of the Western Hemisphere to this day. "This cinematic novel contributes greatly to the debate over how the historical figure of Christopher Columbus should be judged today. It's a captivating read that serves as an interesting introduction to the time when the Spanish Empire was ascendant, detailing an exciting event that is under-reported by history. It puts the reader into the shoes of a native who was controversially plucked from the shores of the New World and taken to the Old World, as the globe shifted from the Pre-Columbian Era to Post-Columbian Times. But most of all it's an arresting page-turner and a good old fashioned action-packed adventure tale."-Robert Silverman, Editor-in-Chief, StatePoint Media, Inc. "This fascinating novel offers a historical perspective of the times of discovery of the New World from the eyes of a Taíno-the first natives who Columbus encountered-which gives a humanly touch and new understanding of this native culture. Marc Wilson recreates the compelling story of Enriquillo, a great leader of the natives in the Spanish conquered islands in the Caribbean, and who became a prisoner of Spain. His tale articulates a unique reality never shared before as it delves in the relationship between the native captive and the Spanish captor."-Salvador Habún, El Vocero. P.R. Marcus (Marc) Wilson is a journalist who worked for three daily newspapers, five bureaus of The Associated Press, and was editor and publisher of the "Bigfork Eagle," a weekly newspaper in northwestern Montana. He also is the founder of TownNews.com. Marc is the author of "Hero Street U.S.A.," University of Oklahoma Press, 2009. It was honored as Best History/Political Book in the International Latino Book Awards in 2010. Its Spanish version was similarly honored in 2013. Marc is a graduate of the University of Colorado, where he studied American frontier history under the renowned professor Robert Athearn.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Will the use of artificial intelligence (AI), algorithms, and smart machines be the end of journalism as we know it—or its savior? In *Newsmakers*, Francesco Marconi, who has led the development of the Associated Press and Wall Street Journal's use of AI in journalism, offers a new perspective on the potential of these technologies. He explains how reporters, editors, and newsrooms of all sizes can take advantage of the possibilities they provide to develop new ways of telling stories and connecting with readers. Marconi analyzes the challenges and opportunities of AI through case studies ranging from financial publications using algorithms to write earnings reports to investigative reporters analyzing large data sets to outlets determining the distribution of news on social media. *Newsmakers* contends that AI can augment—not automate—the industry, allowing journalists to break more news more quickly while simultaneously freeing up their time for deeper analysis. Marshaling insights drawn from firsthand experience, Marconi maps a media landscape transformed by artificial intelligence for the better. In addition to considering the benefits of these new technologies,

Marconi stresses the continuing need for editorial and institutional oversight. *Newsmakers* outlines the important questions that journalists and media organizations should consider when integrating AI and algorithms into their workflow. For journalism students as well as seasoned media professionals, Marconi's insights provide much-needed clarity and a practical roadmap for how AI can best serve journalism.

One of the great World War I antiwar novels—honest, chilling, and brilliantly satirical. Based on the author's experiences on the Western Front, Richard Aldington's first novel, *Death of a Hero*, finally joins the ranks of Penguin Classics. Our hero is George Winterbourne, who enlists in the British Expeditionary Army during the Great War and gets sent to France. After a rash of casualties leads to his promotion through the ranks, he grows increasingly cynical about the war and disillusioned by the hypocrisies of British society. Aldington's writing about Britain's ignorance of the tribulations of its soldiers is among the most biting ever published. *Death of a Hero* vividly evokes the morally degrading nature of combat as it rushes toward its astounding finish. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,700 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors, as well as up-to-date translations by award-winning translators.

The first book-length account of a story too long overlooked. *Claro Solis* wanted to win a gold star for his mother. He succeeded—as did seven other sons of “Little Mexico.”

Second Street in Silvis, Illinois, was a poor neighborhood during the Great Depression that had become home to Mexicans fleeing revolution in their homeland. In 1971 it was officially renamed “Hero Street” to commemorate its claim to the highest per-capita casualty rate from any neighborhood during World War II. Marc Wilson now tells the story of this community and the young men it sent to fight for their adopted country. Hero Street, U.S.A. is the first book to recount a saga too long overlooked in histories and television documentaries. Interweaving family memories, soldiers’ letters, historical photographs, interviews with relatives, and firsthand combat accounts, Wilson tells the compelling stories of nearly eighty men from three dozen Second Street homes who volunteered to fight for their country in World War II and Korea—and of the eight, including Claro Solis, who never came back. As debate swirls around the place of Mexican immigrants in contemporary American society, this book shows the price of citizenship willingly paid by the sons of earlier refugees. With Hero Street, U.S.A., Marc Wilson not only makes an important contribution to military and social history but also acknowledges the efforts of the heroes of Second Street to realize the American dream.

Artificial Intelligence: A Modern Approach offers the most comprehensive, up-to-date introduction to the theory and practice of artificial intelligence. Number one in its field, this textbook is ideal for one or two-semester, undergraduate or graduate-level courses in Artificial Intelligence.
