The pleasures and adventures of cruising under sail are amazingly affordable, say Lin and Larry Pardey. But to keep your dream on budget, you have to decide: Are you a cruiser or a consumer? In this book, a logical successor to their Self-Sufficient Sailor and Capable Cruiser, they discuss making your getaway plans, finding a truly affordable boat, keeping your outfitting costs and maintenance time under control, and learning to feel confident as you cruise farther afield. Their comparison of the gear considered necessary by many yachting experts and the gear carried by several cost-conscious cruisers will help you guage wheter you are buying the true necessities or overloading your boat with high-tech items that can break down and steal your sense of confidence offshore. The chapters on getting the most from your cruising funds, the attributes of successful long-term voyagers, how to upgrade your boat with your own hands, plus answers to the then questions most frequently asked by potential cruisers will help you prepare to explore under sail. as Lin and Larry explain, "The decisions you make now will determine if yu'll come back from your cruise feeling more empowered or more enslaved by today's consumer society."

Includes Part 1, Number 2: Books and Pamphlets, Including Serials and Contributions to Periodicals (July - December)

The first comprehensive guide to oneirogens--naturally occurring substances that induce and enhance dreaming | Includes extensive monographs on dream-enhancing substances derived from plant, animal, and human sources | Presents the results of scientific experiments on the effects of using oneirogens | Shows how studies in this area of ethnobotany can yield a scientific understanding of the mysterious mechanism of dreams Oneirogens are plant and animal substances that have long been used to facilitate powerful and productive dreaming. From the beginning of civilization, dreams have guided the inner and outer life of human beings both in relation to each other and to the divine. For centuries shamans have employed oneirogens in finding meaning and healing in their dreams. Drugs of the Dreaming details the properties and actions of these dream allies, establishing ethnobotanical profiles for 35 oneirogens, including those extracted from organic sources--such as Calea zacatechichi (dream herb or |leaf of the god!), Salvia divinorum, and a variety of plants from North and South America and the Pacific used in shamanic practices--as well as synthetically derived oneirogens. They explain the historical use of each oneirogen, its method of action, and what light it sheds on the scientific mechanism of dreaming. They conclude that oneirogens enhance the comprehensibility and facility of the dream/dreamer relationship and hold a powerful key for discerning the psychological needs and destinies of dreamers in the modern world.
