health care facilities, is a breakthrough standard in terms of its scope. AAMI has updated ST79 with the release of ST79:2010/A4:2013. Of particular importance, A4:2013 provides four new figures demonstrating the wrapping of items for steam sterilization and adds an annex focused on Moisture assessment. As of Oct. 25, 2013, purchasers of ST79 will receive ANSI/AAMI ST79:2010 and A1:2010 and A2:2011 and A3:2012 and A4:2014 as a single consolidated document. Among other changes from the 2006 edition of ST79, this revised and expanded second edition of ST79 includes guidance on the use and application of Class 6 emulating indicators, a chemical monitoring device fairly new to the United States. Because ST79 essentially consolidates five AAMI steam sterilization standards (whose content was reviewed and updated to reflect current good

The starting point for this research is the ascertainment of a major change in the spirituality paradigm of the last centuries of the European Middle Ages, which, since the 13th century, results in a new and final interpretation, focused on pauperistic, evangelical and apostolic ideals, of the religious phenomenon. This symbolic revolution, which completely changed parameters and involved both men and women, entailed an intense urbanisation and feminisation of spirituality. Within that general framework, the pages of this book attempt at investigating the penetration, evolution and changes of the new forms of female monastic and religious life in a delimited space and time: the kingdoms of the Iberian Peninsula during the period from the 13th to the 16th century, trying to establish the connection between those new spaces of
