An introduction to the cross-cultural study of art from an anthropological perspective, this book is about the human condition in all its diversity. It explores the question of whether there is a correlation between the level of complexity of society and the nature of art.

The Routledge Handbook of the Sociology of Arts and Culture offers a comprehensive overview of sociology of art and culture, focusing especially – though not exclusively – on the visual arts, literature, music, and digital culture. Extending, and critiquing, Bourdieu ’ s influential analysis of cultural capital, the distinguished international contributors explore the extent to which cultural omnivorousness has eclipsed highbrow culture, the role of age, gender and class on cultural practices, the character of aesthetic preferences, the contemporary significance of screen culture, and the restructuring of popular culture. The Handbook critiques modes of sociological determinism in which cultural engagement is seen as the simple product of the educated middle classes. The contributions explore the critique of Eurocentrism and the global and cosmopolitan dimensions of cultural life. The book focuses particularly on bringing cutting edge ‘ relational ’ research methodologies, both qualitative and quantitative, to bear on these debates. This handbook not only describes the field, but also proposes an agenda for its development which will command major international interest.

This volume emphasizes the economic aspects of art and culture, a relatively new field that poses inherent problems for economics, with its quantitative concepts and tools. Building bridges across disciplines such as management, art history, art philosophy, sociology, and law, editors Victor Ginsburgh and David Throsby assemble chapters that yield new perspectives on the supply and demand for artistic services, the contribution of the arts sector to the economy, and the roles that public policies play. With its focus on culture rather than the arts, Ginsburgh and Throsby bring new clarity and definition to this rapidly growing area. Presents coherent summaries of major research in art and culture, a field that is inherently difficult to characterize with finance tools and concepts Offers a rigorous description that avoids common problems associated with art and culture scholarship Makes details about the economics of art and culture accessible to scholars in fields outside economics

Culture is not simply an explanation of last resort, but is itself a rich, multifaceted and contested concept and set of practices that needs to be expanded, appreciated and applied in fresh ways if it is to be both valued in itself and to be of use in practical development. This innovative book places culture, specifically in the form of the arts, back at the centre of debates in development studies by introducing new ways of conceptualizing art in relation to development. The book shows how the arts and development are related in very practical ways – as means to achieve development goals through visual, dramatic, filmic and craft-inspired ways. It advocates not so much culture and development, but rather for the development of culture. Without a cultural content to economic and social transformation the problems found in much development – up-rooting of cultures, loss of art forms, languages and modes of expression and performance – may only accelerate. Paying attention to the development of the arts as the content of development helps to amend this culturally destructive process. Finally, the book argues for the value of the arts in attaining sustainable cultures, promoting poverty alleviation, encouraging self-empowerment, stimulating creativity and the social imagination, which in turn flow back into wider processes of social transformation. Discussion questions at the end of each chapter make this book ideal to help foster further thinking and debate. This book is an inspiring read for postgraduate students and researchers in the fields of development studies, cultural studies and sociology of development.

Tattoos as art, work, decoration and defiance.

In 1864, Union soldier Charles George described a charge into battle by General Phil Sheridan: "Such a picture of earnestness and determination I never saw as he showed as he came in sight of the battle field . . . What a scene for a painter!" These words proved prophetic, as Sheridan ’ s desperate ride provided the subject for numerous paintings and etchings as well as songs and poetry. George was not alone in thinking of art in the midst of combat; the significance of the issues under contention, the brutal intensity of the fighting, and the staggering number of casualties combined to form a tragedy so profound that some could not help but view it through an aesthetic lens, to see the war as a concert of death. It is hardly surprising that art influenced the perception and interpretation of the war given the intrinsic role that the arts played in the lives of antebellum Americans. Nor is it surprising that literature, music, and the visual arts were permanently altered by such an emotional and material catastrophe. In The Arts and Culture of the American Civil War, an interdisciplinary team of scholars explores the way the arts – theatre, music, fiction, poetry, painting, architecture, and dance – were influenced by the war as well as the unique ways that art functioned during and immediately following the war. Included are discussions of familiar topics (such as Ambrose Bierce, Peter Rothermel, and minstrelsy) with less-studied subjects (soldiers and dance, epistolary songs). The collection as a whole sheds light on the role of race, class, and gender in the production and consumption of the arts for soldiers and civilians at this time; it also draws attention to the ways that art shaped – and was shaped by – veterans long after the war.

"Clement Greenberg is, internationally, the best-known American art critic popularly considered to be the man who put American vanguard painting and sculpture on the world map. . . . An important book for everyone interested in modern painting and sculpture."—The New York Times
