Praise for Pension Revolution "When Keith Ambachtsheer puts his keen mind to work on a problem, watch out! Here he exposes today's fragile arrangements for the most serious social dilemma of our times--financing retirement. Then he provides a compelling and powerful set of solutions. His writings are essential reading for all who care about the future of American living standards." --Peter Bernstein, founder and President, Peter L. Bernstein, Inc., and author of Capital Ideas and Against the Gods "This book describes one of the most ingenious inventions in the history of mankind: pension funds offering credible promises about old-age income. It reads like a thriller: how can well-governed pension funds be created in an imperfect world in which mortals wrestle with foibles and moral shortcomings? One of the world's leading experts on pensions searches for the answer--and finds it." --Lans Bovenberg, Scientific Director, Network for Studies on Pensions, Aging, and Retirement, Tilburg University, The Netherlands "Pension Revolution exposes the inadequacies of current pension systems and persuasively makes the case for the fundamental changes that are needed. It is essential reading for both the pension industry and policymakers." --Elizabeth Bryan, Chair, Investment Committee, Unisuper Management PM Ltd, Australia "Most analyses of complicated issues deal with complexity by simplifying or only looking at one piece-part, and, in doing so, provide limited value. In stark contrast, Keith Ambachtsheer boldly wades into the complexity in Pension Revolution to come up with a valuable integrative solution. He is a most welcome revolutionary!" --Roger Martin, Dean, Joseph L. Rotman School of Management, University of Toronto, Canada "We have known Keith for over ten years, and consistently over that time, he has constructively and comprehensively challenged conventional wisdom. He has done this so effectively that many of his initial thoughts have now become universally accepted norms. Such is his energy however that he continues to push the boundaries of pension and investment thinking." --Peter Moon, Chief Investment Officer, Universities Superannuation Scheme Ltd, UK "Pension Revolution not only explains the shortcomings of the existing pension system and the underlying design features that have resulted in the current pension upheaval. It also offers thoughtful and creative suggestions for prospective pension design. A must-read for anyone interested in the future of retirement finance." --James Poterba, Professor of Economics, Massachusetts Institute of Technology and a member of the TIAA-CREF Board of Trustees

The purpose of 'Pension & Retirement Plan Management: A Guide for Managers and Other Fiduciaries' is to provide reliable guidance for regulatory compliance, advice on managerial strategies, and some clarity on the underlying economics and finance of pension and retirement plans.

In The Pension Fund Revolution, originally published nearly two decades ago under the title The Unseen Revolution, Drucker reports that institutional investors, especially pension funds, have become the controlling owners of America's large companies, the country's only capitalists. He maintains that the shift began in 1952 with the establishment of the first modern pension fund by General Motors. By 1960 it had become so obvious that a group of young men decided to found a stock-exchange firm catering exclusively to these new investors. Ten years later this firm (Donaldson, Lufkin & Jenrette) became the most successful, and one of the biggest, Wall Street firms. Drucker's argument, that through pension funds ownership of the means of production had become socialized without becoming nationalized, was unacceptable to the conventional wisdom of the country in the 1970s. Even less acceptable was the second theme of the book: the aging of America. Among the predictions made by Drucker in The Pension Fund Revolution are: that a major health care issue would be longevity; that pensions and social security would be central to American economy and society; that the retirement age would have to be extended; and that altogether American politics would increasingly be dominated by middle-class issues and the values of elderly people. While readers of the original edition found these conclusions hard to accept, Drucker's work has proven to be prescient. In the new epilogue, Drucker discusses how the increasing dominance of pension funds represents one of the most startling power shifts in economic history, and he examines their present-day impact. The Pension Fund Revolution is now considered a classic text regarding the effects of pension fund ownership on the governance of the American corporation and on the structure of the American economy altogether. The reissuing of this book is more timely now than ever. It provides a w

While the immediate dangers from the recent financial crisis have abated—much of the financial system has returned to profitability and the economy is growing, albeit slowly—the damage to the economy will linger for years. Among the many impacts is the problem that may be most acute in the United States: how state and local governments and private companies will honor their obligations under defined benefit (DB) pension plans. Institutional investors also confront new difficulties in the low-interest-rate environment that has prevailed since the onset of the crisis. East Asian economies, namely in Japan, Korea, and China, also face pension issues as their populations age. In Growing Old, experts from academia and the private sector consider the hard questions regarding the future of pension plans and institutional money management, both in the United States and in Asia. This volume is the latest collaboration between the Brookings Institution and the Nomura Institute of Capital Markets Research on issues confronting the financial sector of common interest to audiences in the United States and Japan. Contributors: Olivia S. Mitchell (Wharton School, University of Pennsylvania), Akiko Nomura (Nomura Institute of Capital Markets Research), Robert Novy-Marx (Simon Graduate School of Business, University of Rochester), Betsy Palmer (MFS Investment Management), Robert Pozen (Harvard Business School), Joshua Rauh (Kellogg School of Management, Northwestern University), Natalie Shapiro (MFS Investment Management)
