In the mid-seventies, both gender studies and humor studies emerged as new disciplines, with scholars from various fields undertaking research in these areas. The first publications that emerged in the field of gender studies came out of disciplines such as philosophy, history, and literature, while early works in the area of humor studies initially concentrated on language, linguistics, and psychology. Since then, both fields have flourished, but largely independently. This book draws together and focuses the work of scholars from diverse disciplines on intersections of gender and humor, giving voice to approaches in disciplines such as film, television, literature, linguistics, translation studies, and popular culture.

The chapters in this book illustrate a range of cutting edge research in language and gender studies, with contributions from a number of internationally recognised experts. The three themes, femininity, feminism and gendered discourse are central to research in language and gender, and the book thus makes a valuable contribution to a number of current debates. Femininity comprises a central aspect of gender performance and the process of “gendering” individuals is on-going and unavoidable. For many people, the word “femininity” has associations with “frilly pink party dresses,” with demureness, deference, and lack of power and influence. The first section of this book demonstrates some alternative conceptions of femininity, and a range of ways in which femininity is performed in different contexts and cultures. The analyses illustrate that we are all continually performing aspects of femininity (and masculinity) in flexible, dynamic, ambiguous, predictable and unpredictable ways. Language and gender research has a long tradition of engagement with the political, and specifically with feminism and feminist goals. The chapters in the second section of this book demonstrate the value of identifying gendered patterns in order to challenge their potentially repressive effects in social interaction in a range of spheres. The researchers analyse contemporary international evidence of sexism in language use, including material from Japanese spam emails expressing sexual desire, and from media reporting on male and female candidates in the 2007 French elections. The final section of this book focuses on the different ways in which we negotiate our gender through discourse. Gender is just one of many facets of our intrinsically hybridized social identities. Nevertheless, it is a very significant facet, a salient dimension in everyday life, with a pervasive social

influence on everything we do and say. Interaction is typically viewed through “gendered” spectacles much of the time. The chapters in the third section focus in detail on diverse ways in which gender is constructed through discourse, examining the interaction between individual agency and the larger constraining social structures, including socio-cultural norms, within which that agency is enacted. Finally, the different contributions in this book represent research from a multiplicity of geographic and cultural backgrounds, supporting efforts to internationalise language and gender research, and to raise awareness of empirical studies undertaken in a wide range of linguistic and cultural contexts.

Launched in 1975, the Califia Community organized activist educational camps and other programs in southern California until its dissolution in 1987. An alternative to mainstream academia’s attempts to tie feminism to university courses, Califia blended aspects of feminism that spanned the labels “second wave” and “radical,” attracting women from a range of gender expressions, sexual orientations, class backgrounds, and races or ethnicities. Califia Women captures the history of the organization through oral history interviews, archives, and other forms of primary research. The result is a lens for re-reading trends in feminist and social justice activism of the time period, contextualized against a growing conservative backlash. Throughout each chapter, readers learn about the triumphs and frictions feminists encountered as they attempted to build on the achievements of the postwar Civil Rights movement. With its backdrop of southern California, the book emphasizes a region that has often been overlooked in studies of East Coast or San Francisco Bay-area activism. Califia Women also counters the notions that radical and lesbian feminists were unwilling to address intersectional identities generally and that they withdrew from political activism after 1975. Instead, the Califia Community shows evidence that these and other feminists intentionally created an educational forum that embraced oppositional consciousness and sought to serve a variety of women, including radical Christian reformers, Wiccans, scholars of color, and GLBT activists.

Like his novel, *Snow Falling On Cedars*, for which he received the PEN/Faulkner Award, Guterson’s beautifully observed and emotionally piercing short stories are set largely in the Pacific Northwest. In these vast landscapes, hunting, fishing, and sports are the givens of men’s lives. With prose that stings like the scent of gunpowder, this is a collection of power.
