A collaborative effort between the Bureau of Justice Assistance and Office of Juvenile Justice and Delinquency Prevention, the NGC disseminates information, knowledge, and outcome-driven practices that engage and empower those in local communities with chronic and emerging gang problems to create comprehensive solutions to prevent gang violence, reduce gang involvement, and suppress gang-related crime.

~~Youth Violence | Gangs | Office of Justice Programs~~

Early intervention by well-trained social workers, youth workers and support staff can only go a small way in rectifying the problem of violent gangs. Workers can ensure that young people are being supported with family, school and self-esteem issues, however, what is really needed is structural change.

Here you will find Craig Pinkney's current research or publications on gangs and serious youth violence. craigpinkney.com. ... Social Media as a Trigger for Youth Violence (2017) Journal Title: Catch 22 . Citation:

This absorbing new collection is an introduction to the study of gangs: how we define them, what we know and don't know about gangs. The authors offer both a domestic and international view of processes of delinquency and gang formation and identity. It is an ideal text for criminal justice, sociology and social work, and a resource for law enforcement, probation and parole practitioners, and public defenders.

In the quarter century since the first edition of this book, scholarship on gangs in general, and especially youth gangs, has grown exponentially. This massive expansion of the literature on youth gangs, especially in the past decade, warranted this expanded and updated fourth edition. The first chapter has an expanded discussion of definitional issues, plus recent data from the National Youth Gang Survey, material on the evolving economic nature of gangs, and gang use of internet and social media. The second chapter continues by examining gang violence and drug involvement, and the extent to which they are intercorrelated, with new material on victimization of gang members and gang involvement in drug use and sales. Chapter 3 focuses on racial and ethnic decadences in gangs and the important role of race and ethnicity on gang membership and gang behavior in the U.S. The fourth chapter examines female gangs and gang membership and the changes that have taken place in the nature and extent of female gang membership over time. The fifth and sixth chapters place contemporary American gangs in

the historical and international perspective. Chapter 5 includes a new section on youth gangs in the new millennium, and Chapter 6 has been reorganized, particularly to reflect the burgeoning research on European and other international gangs since the turn of the millennium. Chapter 7 has been expanded to include recent developments in the actual and potential application of biosocial, psychological, and life course developmental theories to gangs. Chapter 8 provides a comprehensive, multilevel theory of gangs with updates including new propositions, and new evidence for both the new and old propositions, based on more recent work in theory development and theory testing for gangs. The ninth and tenth chapters' revisions focus on legislative and justice system efforts to deter gang crime and membership. Chapter 10 also focuses on intervention and assistance programs outside the justice system, including discussion of the Gang Resistance Education and Training program. The final chapter concludes by considering the future of youth gangs in the U.S. and elsewhere in light of historical and cross-national evidence, theory, and experience with gang interventions and programs, considering more recent developments in those areas, and whether they justify any change and for what would be expected of the future of youth gangs.

This is the first book dedicated to Australian youth gangs, exploring the subtleties and nuances of street life for young men and their quest for social respect. The key focus is on group violence and the ways in which the 'gang' provides a forum for the expression of this violence.

In this book, Irving Spergel details the efforts of his Chicago youth gang project, a comprehensive, community-based model designed to reduce gang problems, including violence and illegal drug activity. He offers an in-depth description of the Little Village Gang Violence Reduction Project, revealing the successes and failures of intervention at each level: individual youths, the gang itself, and the community at large. Spergel relates how a coalition of criminal justice, neighborhood, and academic organizations along with a team of tactical officers, probation officers, former gang leaders, and a neighborhood organization developed strategies for dealing with hardcore violent male youths from two gangs: the Latin Kings and Two Six. This well-known project has become the model for a series of national initiatives. Policymakers, criminologists, and gang researchers will find this model valuable for assessing gang programs and reducing gang violence.

For eight years Keith Morton codirected a safe-space program for youth involved in gang or street violence in Providence, Rhode Island. Getting Out is a result of the innovative perspectives he developed as he worked alongside staff from a local nonviolence institute to help these young people make life-affirming choices. Rather than view their violence as pathological, Morton explains that gang members are victims of violence, and the trauma they have experienced leads them to choose violence as the most meaningful option available. To support young people as they "unlearn" violence and pursued nonviolent alternatives, he offered what he calls a "Youth Positive" approach that prioritizes healing over punishment and recognizes them as full human beings. Informed by deep personal connections with these youth, Morton contends that to help them, we need to change our question from "What is wrong with you?" to "What happened to you?"

Few issues attract greater concern and censure than those that surround youth 'gangs'. Comprising a series of essays from leading national and international researchers, this book subjects such claims to rigorous critical scrutiny. It provides a challenging and authoritative account of complex questions pertaining to urban youth identities, crime and social order.

Youth violence has become a concern as gangs become a popular option for urban children and teenagers and weapons use among young populations becomes more prevalent. Exploring the psychological motivations and foundations upon which such violence is developed and cultivated can

assist in better understanding the modern dilemma of violence, weapons use, and gang behavior among children, teenagers, and young adults. *Global Perspectives on Youth Gang Behavior, Violence, and Weapons Use* reconsiders the traditional understandings of youth violence in various forms, such as gang activities, criminal behavior, and weapons use. Focusing on the psychosocial elements of violence among children, teenagers, and young adults, this timely publication is ideally designed for use by policy makers and government executives, professionals, educators, and graduate-level students involved in psychology, criminology, social work, and criminal justice studies.

This is the first book dedicated to Australian youth gangs, exploring the subtleties and nuances of street life for young men and their quest for social respect. The key focus is on group violence and the ways in which the 'gang' provides a forum for the expression of this violence.

This study, based on quantitative and qualitative data gathered over a twelve-year period, takes its title from the two predominant styles of gang violence: 'drive-bys,' which have replaced 'rumbles' as the primary form of gang violence; and 'gang-bangs' - a generic term for other gang violence that includes assaults, knifings, and beatings. The author attempts to understand the situations in which a young man would drive up to another human being and, without further ado, blow his head off. By examining hundreds of such situations, and employing both structural and phenomenological analysis, Sanders explores the various configurations of gang violence. *Gangbangs and Drive-bys* also examines the routines of gang members and their view of life, the different styles of gangs, and changes undergone by gangs from the early 1980s to the end of the same decade. Over that period, the emphasis shifted from parties and paybacks to big money from the sale of rock cocaine, and from unstructured to organized crime. Along with that shift came an increase in the violence. Finally, Sanders traces the beginning and evolution of a metropolitan police gang unit over the same decade in order to present an inside view of how the police attempt to deal with and understand gangs.
