The cute, the bad and the visitors from hell. Like many people I am not a big fan of creepy crawlies – particularly the eight legged ones. Luckily New Zealand has been blessed by the absence of the really nasty ones. We got off lightly compared to Australia. Our big brother across the ditch took one for the team, thanks Straya!

Nudibranchs are arguably the most beautiful of the marine creepy-crawlies. They are soft-bodied and in fact belong to the mollusc phylum as well as the gastropod class. They've merely shed their...

### **Beautiful Undersea Creepy Crawlies | by Mariecor Agravante ...**

ARS Entomologist Dr. Stu McKamey has studied this group of insects for 36 years and is considered the world authority on treehoppers. He believes the scary-looking insect derived its name from living and hopping between plants and trees, sometimes masquerading as a predator and using other insects to ensure its longevity.
