Engineering The Future Textbook Online

Engineering the Future has been designed to meet that need. Engineering the Future: Science, Technology, and the Design Process is a set of four design-based project modules, which can be taught as a one-year course or as four eight-week projects, that introduce students to the world of technology and engineering.

Engineering the Future® - Activate Learning

This book pilots the reader into the future. The first three chapters introduce new materials and material processing methods. Then five chapters present innovative new design directions and solutions. The main section of the book contains ten chapters organized around problems and methods of manufacturing and technology, from cutting process optimisation through maintenance and control to the ...
