A go-kart is a kind of open-wheel auto. Go-karts come in all shapes and structures, from motor less models to powerful hustling machines. Numerous recreational karts can be controlled by four-stroke motors or electric engines, while hustling karts utilize a two-stroke or, once in a while, higher fueled four-stroke motors.

Design and Fabrication of the Go-kart - UKDiss.com

If the wheel leans in towards the chassis, it has negative camber; if it leans away from the car, it has positive camber. so on a Go Kart it should be 0. in the middle of both positive and negative. Caster Positive caster angle is best illustrated by the rearward tilt of the steering fork on a bicycle. Positive caster obviously places the front wheel ahead of its pivot point and most vehicles are designed with positive caster angle.
