This page is devoted to providing sources of information on agates, jaspers, and petrified wood. Literature about these stones, their formation and where they are found is presented below.

Publications | The Gem Shop, Inc.

Fossils, in addition to being clues to ancient geography, are also clues to the climate of the past. Fossil corals show that warm, shallow seas once covered New York. And plant fossils show that the climates of Antarctica and Greenland were once mild. Certain fossils of limited time distribution clearly mark certain beds or strata of rocks.
