International Law And The Aerial

Air warfare must comply with laws and customs of war, including international humanitarian law by protecting the victims of the conflict and refraining from attacks on protected persons. These restraints on aerial warfare are covered by the general laws of war, because unlike war on land and at sea—which are specifically covered by rules such as the 1907 Hague Convention and Protocol I additional to the Geneva Conventions, which contain pertinent restrictions, prohibitions and guidelines ...

6 For commentary on the debate surrounding unmanned aerial systems, see, e.g., Michael N. Schmitt, “Narrowing the International Law Divide: The Drone Debate Matures”, Yale Journal of International Law Online, Vol. 39, 2014. On the subject of autonomous weapons more broadly, the strength of

International law and the military use of unmanned ...

Oxford Law Citator. 1 Beginning with the rise of military—as well as civil—aviation during the early and middle decades of the last century, there have been quite a number of aerial incidents (peaking during the Cold War [1947–91] period). For example, when an airplane (allegedly) intrudes into foreign airspace, this poses a conflict of interests between the airplane and its carriage on the one hand, and the State whose sovereign rights may be violated by this intrusion on the other.

Oxford Public International Law: Aerial Incident Cases ...

International Customary Law. The genesis of International law relating to air safety is to be found in the Convention relating to the regulation of Aerial Navigation, 1910 which recognizes that every nation has an exclusive sovereignty over the air space above its territory, with the prevalence of hijacking attempts in the 1960s, the void of any relevant customary international law to meet the challenge became potently obvious.

Aerial Hijacking and the International Law

U.S. drone strikes represent a significant challenge to the international rule of law. This is not because recent U.S. drone strikes “violate” international law; iro-nically, they might be less destabilizing, from a rule-of-law perspective, if they could be easily categorized as blatant instances of rule-breaking. Rather, U.S.

Drones and the International Rule of Law

International law relating to aerial bombardment before and during World War II rests on the treaties of 1864, 1899, and 1907, which constituted the definition of most of the laws of war at that time - which, despite
