(PDF) Laboratory Production of Cattle Embryo 2nd Edition ...

Laboratory embryo production came to be viewed as a research tool rather than a practical means of improving the lot of the cattle producer. Today's commercial use of in vitro embryo production is almost exclusively con-fined to obtaining young from problem cows - those that have failed to produce embryos by conventional ET means.

Laboratory production of cattle embryos - LinkedIn SlideShare
In vitro produced embryos in cattle have now doubled the number produced in vivo by superovulation and embryo flushing [17], confirming the interest and the value of ART to the cattle industry despite the fact that, contrary to the horse [18], superovulation is effective and it has been used in practice for several decades [19].

Laboratory Production of Equine Embryos - ScienceDirect

In this article, we present a retrospective analysis of 10 years of work at Avantea with a special focus on the last 3 years. Based on our data, an average production of 1.7 to 2 embryos per OPU-ICSI procedure can be obtained from warmblood donor mares with a pregnancy rate of 70% and a foaling rate in excess of 50%.
