Offered by Google. This course will transition you from working on a single computer to an entire fleet. Systems administration is the field of IT that's responsible for maintaining reliable computers systems in a multi-user environment. In this course, you'll learn about the infrastructure services that keep all organizations, big and small, up and running.

System Administration and IT Infrastructure Services ...

As a general rule, the OpenLDAP client tools such as ldapmodify and ldapsearch use ldap.conf (not slapd.conf) for default settings. In the tradition of Unix configuration files, slapd.conf is an ASCII file with the following rules: Blank lines and lines beginning with a pound sign (#) are ignored.

3.5 The slapd.conf Configuration File :: Chapter 3 ...

Perhaps is not a complete guide for LDAP administration, but covers the basics about LDIF, OID, tree structure -organization and replication-, indexes and so. I found very useful the explanation about LDAP use in system integration: accounting issues for services (nss, pam), mail routing, and AD issues.

LDAP System Administration: Putting Directories to Work ...

Read Book Ldap System Administration

LDAP System Administration starts with a brief review of LDAP in its incarnations and takes you quickly into the theory of distributed directory services. This book will work best if you some place where you can experiment with the commands a bit.
