A Survey of Multiple Criteria Decision Methods | SpringerLink

In stressful times, leaders will have to make more big-bet decisions than before and also will be worried about their people. When making a high-stakes decision, it's important to be able to focus attention on the issue at hand. That means minimizing distractions. If a leader is too frenzied, they are likely to make errors in judgment.

Decision making in uncertain times | McKinsey

Multiple-criteria decision-making (MCDM) or multiple-criteria decision analysis (MCDA) is a sub-discipline of operations research that explicitly evaluates multiple conflicting criteria in decision making (both in daily life and in settings such as business, government and medicine). Conflicting criteria are typical in evaluating options: cost or price is usually one of the main criteria, and some measure of quality is typically another criterion, easily in conflict with the cost. In purchasing
