Physics of Music Lecture Notes

Physics of music is really the physics of waves. We will concentrate on sound waves, but all waves behave in a similar way. Wave theory is probably the most important concept in physics and especially modern physics, much more so than projectile motion and classical mechanics. 5.

Why Learn Physics Through Music

Pretty simple. Sound waves are made of a series of high and low points. As they move through a medium such as air, the air particles compress and decompress. So sound waves are also pressure waves. Controlling these different waves, which represent important principles of physics, is how people learn to make music.
