DNA fingerprint The representation of parts in an individual's DNA that can be used to identify a person at the molecular level . 6. genetic engineering The changing of on organisms DNA to give the organism different traits. 7. recombinant DNA DNA that contains genes from more than one organism. 8.

Gene Splicing Web Quest - Name_Date_Block DNA Technology ...

Students construct paper recombinant plasmids to simulate the methods genetic engineers use to create modified bacteria. They learn what role enzymes, DNA and genes play in the modification of organisms. For the particular model they work on, they isolate a mammal insulin gene and combine it with a bacteria's gene sequence (plasmid DNA) for production of the protein insulin.
