### (PDF) Urban stormwater management in developing countries ...

Urban stormwater management, as understood in this document, refers to all the measures undertaken to improve the way in which the flow and volumes of water generated by rainfall and surface runoff in urban areas are controlled and managed. 2 STORMWATER MANAGEMENT IN DEVELOPED COUNTRIES

### Urban stormwater management in developing countries

Rapid and unplanned urbanization in developing countries has resulted in increasing amounts of stormwater and pollution of receiving water bodies. In most cases, this is due to the lack of adequate...

### Urban Stormwater Management in Developing Countries ...

Stormwater management integrates a technical, scientific and social approach. A comprehensive review of sustainable stormwater management key issues was made. A good decision must be in harmony with the place, time and existing constraints. A flowchart is presented aiming at guide and support urban stormwater development. The work is intended to be valuable to researchers, engineers and decision-makers.

### Key issues for sustainable urban stormwater management ...

This book calls for an entirely new permitting structure that would put authority and accountability for stormwater discharges at the municipal level. A number of additional actions, such as conserving natural areas, reducing hard surface cover (e.g., roads and parking lots), and retrofitting urban areas with features that hold and treat stormwater, are recommended.

### **Urban Stormwater Management in the United States | The ...**

Urban stormwater continues to be a significant source of water pollution and public health concern. As communities continue to grow and develop their local economies, they look for sustainable and effective approaches to reduce these existing and emerging sources of pollution.

### **Stormwater Planning | National Pollutant Discharge ...**

Design Storm: The BMP should satisfy stormwater management objectives for small, frequently-occurring storms in order to reduce the incidence of CSOs and mitigate urban stormwater pollution. Source Control: The BMP should be able to meet the stormwater management objectives for relatively small quantities of stormwater at or near the source, rather than at a centralized collection point.
